Share price: SEK3.20 Fair value range: SEK8.0–13.0

# We expect signs of a turnaround in H2(25) - QI review

# Significant revenue decline Y/Y

Sales in Q1(25) were EUR9.8m, corresponding to a growth rate of -48.6% Y/Y and -20.6% Q/Q. The number was EUR1.9m lower than our estimate. The reason for the negative growth rate is weak performance at the Paid Publisher Network in the quarter and tough comparisons in Affiliation Marketing due to the Y/Y decline at the Casumba assets. Q/Q, revenue from Affiliation Marketing followed the historical seasonal pattern with a slight decline versus the previous quarter. Adjusted EBITDA was EUR2.4m, corresponding to a margin of 24.6% vs our estimate of EUR2.9m. The free cash flow before earnouts was EUR1.7m. We argue that there is some sign of light in the tunnel, as the number of active revenue generated publishers increased to 80+ from 50 in Q1(24).

#### We still argue for an operational turnaround during 2025e

Given that the result came in below our expectations, we are lowering our sales estimates by an average of 15%. Due to the strong cost control and as we are only decreasing our estimates for Subaffiliation, where the gross margin is lower, we are only lowering our EBITDA estimates for the period by an average of 5%.

## We argue that the new strategy will bear fruit

Based on the data related to SlotsJava and strong growth in the organic Publisher Network, we believe Raketech could return to growth Y/Y and deliver high cash flow to settle the remaining earnouts. We think the new plan to settle the Casumba earnout over a longer time and payments linked to free cash flow will decrease the risk of dilution in the share as the potential share component has been removed.

# Deleveraging key component in value creation

We estimate that Raketech will generate accumulated free cash flow of EUR32m during 2025–27. This can be compared with the remaining earnout of EUR24m. Given our lower estimates we are lowering our fair value range to SEK8.0–13.0 (9.0–14.0).

				we are lowering our	iali value	i alige to		-13.0(7)	0-14.0).

- Q2 Report: 23 Jul 2025
- Q3 Report: 06 Nov 2025

Raketech

Equity story	
Near term: 6–12m	We see an operational turnaround as the main catalyst for the share in the near term. A return to growth Y/Y and growing cash flow reduce the risk related to the current earnouts, lowering the cost of capital in our DCF. We also see growth from Raketech SaaS solution AffiliationCloud as a potential trigger. Given that software companies tend to be valued at a premium to affiliation companies, an increased share of SaaS revenue could lead to multiple expansion for Raketech.
Long term: 5Y+	We believe that the long-term equity story in Raketech rests on the shift from offline to online gambling. As the online market grows, driven by behavioural and regulatory shifts, so do the marketing investments from operators. Given that affiliation is roughly 30% of marketing spend among operators, affiliate companies such as Raketech should benefit from this trend.
Key risks:	<ul> <li>High earnouts can lead to dilution.</li> <li>Changing, unstable regulations will decrease investments in marketing from operators.</li> <li>Changes in Google algorithms can affect the ranking of Raketech assets, leading to a decline in revenue.</li> </ul>

#### **Company description**

Raketech is a leading online affiliate services and content marketing company, specialising in the delivery of comparative services for sports and gaming, online guides, communities, and social media. The company was founded in 2010 and went public in 2018.

#### **Key industry drivers**

- Shift from offline to online gambling
- New markets are opening up due to regulation
- Increased share of marketing budgets online

#### Industry outlook

#### Largest shareholders

Latin America and North America are showing high provobis Holding AB 10.3% structural growth Tobias Persson Rosenqvis 8.1%
 European market is stable, local reregulation can hurt Erik Skarp 7.9% customer intake in short run

#### Cyclicality

Cyclicality: N/A

#### ty Key peers

We believe that other listed affiliates such as Gentoo Media, Better Collective, Catena Media and Gambling.com are key peers.

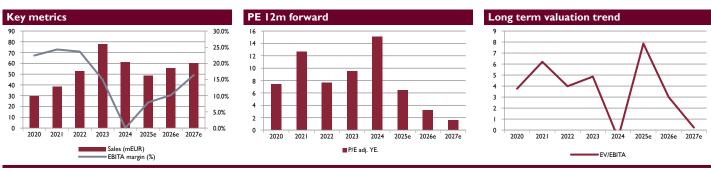

#### Valuation and methodology

We have used a DCF with a WACC range of 12–22% for the valuation of Raketech. We expect that the growth after our estimate year of 2027e will reflect the long-term growth of the igaming industry with a CAGR of 4% during 2028–44e. We have classified the earn-outs to be part of net debt and settled in cash. We believe that the EBITDA margin will normalise at 18% during 2028–44e. We estimate a capex of 12% to sales during 2028–44e. For our terminal value we have used a growth rate of 2%. We argue that the working capital to sales ratio will be 10%.

#### Fair value range 12m

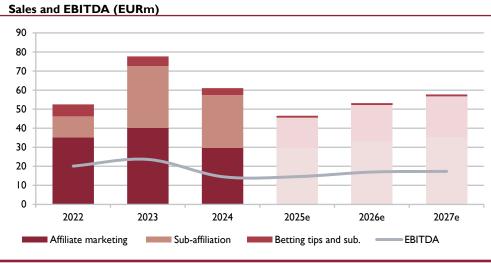

The higher end of the range uses a WACC of 12%; a clear sign of operational turnaround leading to higher cash flow is the main driver behind this scenario. The lower end uses a WACC of 22%, reflecting the uncertainty linked to future earn-outs and a failure to achieve an operational turnaround.

Source: Carnegie Research & company data

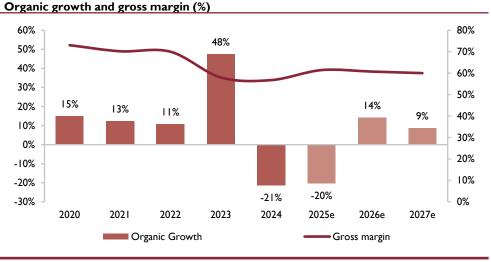

# Raketech in charts

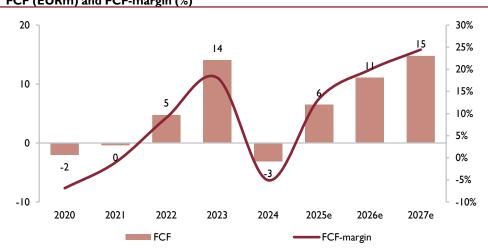

We expect that Raketech will start to return to growth Y/Y H2(25) and during (2026–27). Given the strong cost control we argue that margins will remain stable during the estimate period

Source: Carnegie Research, Company data

According to H2 Gambling Capital, the global market for igaming will grow by a CAGR of 11% during 2024-29e. We argue that Raketech should be able to reach similar growth long term

Source: Carnegie Research, Company data

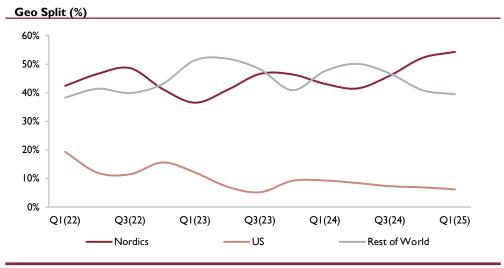

FCF (EURm) and FCF-margin (%)

We believe the accumulated cash flow during 2025–27e of EUR31m will finance the remaining earnouts of EUR24m, giving the company the ability to return cash to shareholders towards the end of our estimate period

Source: Carnegie Research, Company data (Carnegie defenition of FCF)

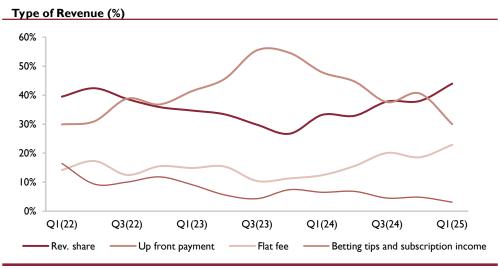

Raketech

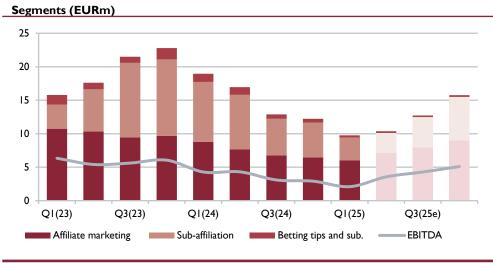

We believe the continuous strong performance in the Nordics shows that the partnership strategy is working

We see the increased share of revenue from revenue share agreements as positive. It does however slow the return to Y/Y growth but increases the resilience in revenue

Source: Carnegie Research, Company data

We estimate that the recovery in revenue will start during Q2(25)

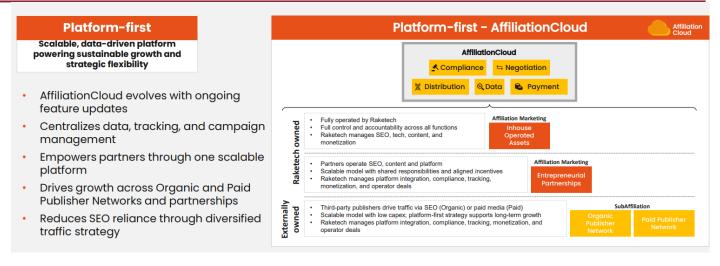

Source: Carnegie Research, Company Data

# Update on strategy

In order to return to growth and lever the structural growth in Igaming, Raketch has launched a platform strategy to be less dependent on volatility in SEO (search engine optimisation). We think this strategy will be beneficial in the long term as more markets are regulating, a process that leads to an increased demand for compliance for operators in their relationship with affiliates.

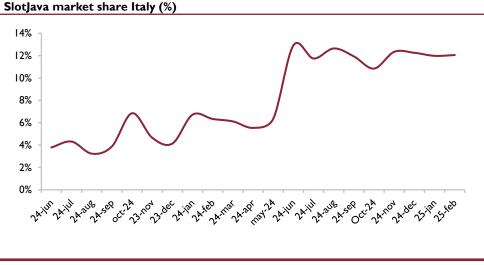

#### Raketech's strategy to become a platform for affiliation

Source. Raketech

Another initiative is to run Affiliate Marketing assets in entrepreneurial partnerships. Right now,  $\sim$ 50% of the assets are operated in partnerships. As we can see in the development of SlotsJava in Italy, this strategy is starting to bear fruit. We argue that an increased share of partner run assets will take Raketech back to growth as we expect a strong underlying igaming market.

We argue that the strength in SlotJava on the Italian market is a sign on that the partnership strategy can be successful for Raketech

Source: Partner Matrix

While the company guides for continuous headwinds for the Paid Network in SubAffiliation, we believe the strong growth for Organic Publisher Network – the number of partners has increased from 50 to over 80 – will return the segment to growth Q/Q during H2(25e), highlighting that the increased partnership strategy has been successful.

# Valuation

In our valuation of Raketech we have looked beyond the current turbulence following the Google updates in spring 2024 and focused on the long-term value creation using a DCF. We believe that Raketech will benefit from a continued shift from offline to online gambling and that affiliate companies will remain an important part of the value chain.

To reflect market concerns regarding the coming earn-out related to Casumba, we have chosen a 12% WACC at the high end of the value range and 22% at the low end. The 22% WACC highlights a scenario where Raketech does not see any operational improvements near term.

# Risks

While the igaming industry has shown a strong resilience for downturns in the general economy, highlighting the structural growth from the shift from offline to online gambling, we have highlighted three key risks for Raketech:

## Technological risks

Raketech is dependent on its assets ranking high in Google search results. As Google is constantly changing its algorithms this can affect the ranking of Raketech's assets. This was clearly seen during 2024 as Raketech's assets that were top ranked in Japan lost in ranking, resulting in less traffic from these assets.

## Regulatory risk

We believe that the regulation of online gambling will increase over time. In the long run this is positive for Raketech as regulation tends to accelerate the shift from offline to online gambling, however in the short run led to uncertainty. This since operators tend to decrease marketing investments when regulations are unclear or in transition phases.

# Counterparty risk

Raketech is dependent on operators investing in marketing or other affiliates in its network producing content that leads to new NDCs. If certain operators are decreasing their marketing this could hurt Raketech as affiliation is one of the easiest forms of marketing to cancel.

# Interim figures

# Disclosures and disclaimers

#### Carnegie Investment Bank AB

Carnegie Investment Bank AB (publ.) is a leading investment bank with a Nordic focus. The Carnegie group of companies, together "Carnegie", generates added value for institutions, companies and private clients in the areas of trade in securities, investment banking and private banking. Carnegie has approximately 600 employees, located in offices in six countries

#### Valuation, methodology, and assumptions

Commissioned research reports include the analyst's assessment of a fair value range over the coming six to 12 months based on various fundamental valuation methods. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E ratio and EV/EBIT multiples, relative to industry peers. For companies where it is appropriate, a fair value range can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Fair value ranges represent the assessment of the analyst(s) at the time of writing

#### Frequency of update

Carnegie's research analysis consists of case-based analyses, which implies that the frequency of the analytical report may vary over time. Unless otherwise expressly stated in the report, the analysis is updated when considered necessary by the research department, for example in the event of significant changes in market conditions or events related to the issuer/the financial instrument.

#### Analyst certification

The research analyst or analysts responsible for the content of this commissioned research report certify that, notwithstanding the existence of any potential conflicts of interests referred to herein, the views expressed in this commissioned research report accurately reflect the research analyst's personal views about the companies and securities covered. It is further certified that the research analyst has not been, nor is or will be, receiving direct or indirect compensation related to the specific ratings or views contained in this commissioned research report.

#### Potential conflicts of interest

Carnegie, or its subsidiaries, may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any company mentioned in this report. Any such publicly announced business activity, during the past 12 months, will be referred to in this commissioned research report. A set of rules handling conflicts of interest is implemented in the Carnegie Group. Investment Banking and other business departments in Carnegie are surrounded by information barriers to restrict the flows of sensitive information. Persons outside such barriers may gain access to sensitive information only after having observed applicable procedures. The remuneration of persons involved in preparing this commissioned research report is not tied to investment banking transactions performed by Carnegie or a legal person within the same group.

Confidential and non-public information regarding Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner.

Internal guidelines are implemented in order to ensure the integrity and independence of research analysts. In accordance with the guidelines the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues; contacts with covered companies, prohibition against offering favourable recommendations, personal involvement in covered companies, participation in investment banking activities, supervision and review of research reports, analyst reporting lines and analyst remuneration.

#### Other material conflicts of interest

This report was commissioned and sponsored by the issuer (issuer-paid research).

#### Distribution restrictions

This commissioned research report is intended only for distribution to professional investors. Such investors are expected to make their own investment decisions without undue reliance on this commissioned research report. This commissioned research report does not have regard to the specific investment objectives, financial situation or particular needs of any specific person who may receive it. Investors should seek financial advice regarding the appropriateness of investing in any securities discussed in this commissioned research report and should understand that statements regarding future prospects may not be realized. Past performance is not necessarily a guide to future performance. Carnegie and its subsidiaries accept no liability whatsoever for any direct or consequential loss, including, without limitation, any loss of profits arising from the use of this commissioned research report or its contents. This commissioned research report may not be reproduced, distributed or published by any recipient for any purpose. The document may not be distributed to persons that are citizens of or domiciled in any country in which such distribution is prohibited according to applicable laws or other regulations.

This commissioned research report is distributed in Sweden by Carnegie Investment Bank AB. Carnegie Investment Bank AB is a bank incorporated in Sweden with limited liability which is authorised and regulated by the Swedish Financial Supervisory Authority (Finansinspektionen). In Finland this commissioned research report is issued by Carnegie Investment Bank AB, Finland Branch. The Finland branch is authorised by the Swedish Financial Supervisory Authority and subject to limited regulation by the Finnish Financial Supervisory Authority (Finansiti/avonta). In Norway this commissioned research report is issued by Carnegie AS, a wholly-owned subsidiary of Carnegie Investment Bank AB. Carnegie AS is regulated by the Financial Supervisory Authority of Norway (Finanstilsynet). In Denmark this commissioned research report is issued by Carnegie Investment Bank AB, Denmark Branch. The Denmark branch is authorised by the Swedish Financial Supervisory Authority and subject to limited regulation by the Danish Financial Supervisory Authority (Finanstilsynet).

This commissioned research report is distributed in the US by Carnegie, Inc., a US-registered broker-dealer and a member of FINRA and SIPC. Carnegie's research analysts located outside of the US are employed by non-US affiliates of Carnegie Inc. ("non-US affiliates") that are not subject to FINRA regulations. Generally, Carnegie research analysts are not registered with or qualified as research analysts with FINRA, and therefore are not subject to FINRA rule 2241 restrictions intended to prevent conflicts of interest by, among other things, prohibiting certain compensation practices, restricting trading by analysts and restricting communications with the companies that are the subject of the research report. Research reports distributed in the U.S. are intended solely for major US institutional investors and US institutional investors as defined under Rule 15a-6 of the Securities Exchange Act of 1934. This commissioned research report is provided for informational purposes only and under no circumstances is it to be used or considered as an offer to sell, or a solicitation of any offer to buy any securities. Reports regarding equity products are prepared by non-US affiliates of and distributed in the United States by Carnegie Inc. under Rule 15a-6(a)(3). When distributed by Carnegie Inc, Carnegie Inc, takes responsibility for the commissioned research report. Any US person who wishes to effect transactions based on this commissioned research report should contact Carnegie Inc. Investors in the US should be aware that investing in non-US securities entails certain risks. The securities of non-US issuers may not be registered with, or be subject to, the current information reporting and audit standards of the US Securities and Exchange Commission. This commissioned research report has been issued in the UK by Carnegie UK which is the UK Branch of Carnegie Investment Bank AB. Carnegie Investment Bank AB. Carnegie Investment Bank AB. Carnegie Investment Bank AB. Carnegie Investment Bank AB.

#### Research Disclaimer

This commissioned research report is provided solely for information. It does not constitute or form part of, and shall under no circumstances be considered as an offer to sell or a solicitation of an offer to purchase or sell any relevant financial instrument.

This commissioned research report has been requested and paid for by the issuer and should therefore be considered a marketing communication (i.e. not investment research). Payment for the report has been agreed in advance on a non-recourse basis. As commissioned research, this material can be considered an acceptable minor non-monetary benefit under MiFID II. It has not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, it is still subject to a prohibition on dealing ahead of the dissemination of the report.

Carnegie Investment Bank AB is responsible for the preparation of this commissioned research report in Sweden, Finland, Denmark, and the UK. Carnegie AS is responsible for the preparation of this commissioned research report in Norway. Carnegie Inc. is responsible for this research report in the US.

The information in this commissioned research report was obtained from various sources. While all reasonable care has been taken to ensure that the information is true and not misleading. Carnegie gives no representation or warranty, express or implied, about its accuracy or completeness. Carnegie, its subsidiaries and any of their officers or directors may have a position, or otherwise be interested in, transactions in securities that are directly or indirectly the subject of this commissioned research report. Any significant financial interests held by the analyst, Carnegie or a legal person in the same group in relation to the issuer will be referred to in the company-specific disclosures.

#### Company specific disclosures

The following disclosures relate to relationships between Carnegie Investment Bank AB (with its subsidiaries, "Carnegie") and the issuer or an affiliate.

 $\ensuremath{\mathsf{Parts}}$  of this commissioned research report may have been submitted to the issuer prior to its publication.
