## **Initiator Pharma**

## Expanding into vulvodynia and securing financing

The business development process for pudafensine in ED appears to have temporarily stalled, prompting the company to advance its plans for the asset in the female sexual dysfunction indication, vulvodynia. To fund this, a SEK56m rights issue and a financing agreement with MAC Clinical Research have been secured. However, we have cut our fair value to SEK9.8–14.2 (16.0–22.0) to reflect dilution and a revised outlook.

**Expanding into vulvodynia.** To further explore the potential of pudafensine, Initiator Pharma is expanding into female sexual dysfunction by initiating a proof-of-concept Phase IIa study in vulvodynia. Recruitment is expected to begin in H2 2025, with the company aiming to complete the study by end-2026. Vulvodynia is a prevalent chronic genital pain condition affecting women, with no currently approved treatments, highlighting a significant unmet medical need.

**Strengthening its financials.** The company is set to conduct a preferential rights issue of ~SEK56m to support the expansion, secured to around 86%. In addition, it has entered into a financing agreement with its principal shareholder, MAC Clinical Research, covering clinical trial costs of up to GBP2.5m (~SEK32.5m). Combined, we believe this should provide funding through to the expected readout of the vulvodynia study in late 2026.

**Revising estimates.** We see a risk that discussions with potential partners may be prolonged, possibly causing delays in advancing the ED projects. As a result, we have pushed out our development assumptions by one year. While the new study in vulvodynia is set to increase costs in the near term, the financing structure with MAC Clinical Research is likely to help reduce cash burn in 2026–27 compared to our previous estimates.

**Fair value range lowered.** To reflect our model adjustments and expected dilution from the upcoming share issue, we have lowered our fair value to SEK9.8–14.2 (16.0–22.0).

#### **Equity story**

Near term: within 12M

Initiator Pharma has made significant progress across its project portfolio in recent years, reducing development risks in its key assets pudafensine and IP2018. However, given the need for extensive and costly Phase III trials to reach market approval, we believe that securing a partner is critical to advancing its erectile dysfunction programmes. As such, delivering partnership agreements stands out as a key potential near-term catalyst in the company's equity story.

Long term outlook: 5Y+

With a lean, virtual organisation, securing partners to advance its assets toward regulatory approval could position Initiator Pharma as a highly profitable company. Our estimates suggest that pudafensine holds peak sales potential exceeding USD1bn in the erectile dysfunction indication alone. Although development risks have been mitigated to some extent, the business risk remains considerable compared to those faced by more mature companies with an established track record of profitability.

Key risks:

- Development risks related to pudafensine and IP2018.
- Unsuccessful in finding partners to its projects.
- The need for additional capital to fund pipeline projects may result in further equity dilution.

#### **Company description**

Initiator Pharma, founded in 2016 by members of its management team as a spin-off from the Danish publicly listed company Saniona, focuses on targets within the central and peripheral nervous systems. Its most advanced projects include pudafensine for organic erectile dysfunction (ED) and IP2018 for psychogenic ED, both with the potential to become first-in-class drugs. Since early 2024, the pipeline has expanded to include indications within female sexual dysfunction.

#### Key industry drivers

- Growing prevalence of sexual dysfunction
- · Increasing interest in CNS related diseases

#### Industry outlook

- We believe there is growing demand for improved treatments of ED.
- Pharma companies need to fill their pipelines as patent expiration looms for many large selling drugs.

Cyclicality

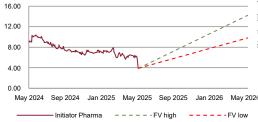

Key peers

Cyclicality: No We view the closest peers to Initiator Pharma as Saniona, IRLAB Therapeutics, Dicot Pharma and Cinclus Pharma

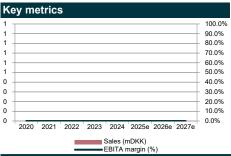

#### Valuation and methodology

We use a probability-adjusted cash flow model, where each project is valued individually and then aggregated in a sum-of-the-parts model (SOTP). In the valuation, we have focused on the company's clinical projects, where we see a clear plan for advancing these further in development.

#### Fair value range 12M

The upper end of our fair value range is based on our SOTP valuation model, using a WACC of 16%, while the lower end applies to a 20% discount. In both valuation scenarios, we assume the company's lead assets advance towards market approval with the support of a partner. However, the lower estimate reflects continued weak investor sentiment toward biotech, whereas the upper estimate assumes improved market conditions.

Source: DNB Carnegie (estimates) & company data

### Valuation and risks

We have lowered our fair value for Initiator Pharma to SEK9.8–14.2 (16.0–22.0), reflecting dilution from the upcoming share issue and increased uncertainty about timelines for its clinical asset. The range is derived from an SOTP analysis, applying a WACC of 16–20%.

In our sum-of-the-parts (SOTP) valuation, we include the clinical assets where we see a clear path to market. Each project is assessed over its expected patent lifespan, and our forecasts are risk-adjusted according to the respective development phase.

#### Pudafensine - the lead asset

In preclinical models, pudafensine has shown promising results across several indications; however, the strongest support from clinical data is currently in erectile dysfunction (ED). In ED, pudafensine targets men who do not achieve satisfactory results with well-established PDE5 inhibitors (e.g. Viagra, Cialis). We estimate this patient group accounts for ~30% of all men with ED, representing around 10m individuals in the EU and the US. To achieve market approval, we believe regulators require safety and efficacy data from two Phase III studies. However, given the significant cost of such trials, we view securing a partner as crucial for advancing to the next phase of development.

Following recent news flow, we see increasing uncertainty around the development timelines of the ED asset and have therefore pushed out our expectation for a potential partner deal to 2026 (previously 2025). Based on this updated view, we now estimate a potential market launch in late 2030 (previously 2029), with peak sales reaching USD1.3bn by 2038e. We assign a 39% probability of approval in the ED indication.

Pudafensine may also have potential as a treatment for neuropathic pain, for which we forecast peak sales of USD450m. Note that our model currently does not include the recent expansion into vulvodynia.

IP2018 is also being investigated in ED, with a specific focus on younger individuals, who, in addition to ED, experience mild to moderate depression. The project is trailing somewhat behind pudafensine in terms of development timelines, and we now estimate market entry in 2032 (previously 2031), with peak sales at USD600m. Based on the promising Phase IIa results, we assign a likelihood of approval (LOA) of 19%.

Sum-of-the-parts - valuation									
Project	Indication	Likelihood of approval (LOA)	Peak sales (USDm)			NPV* WACC (20%)

#### Risks

Initiator Pharma faces several risks as a company, and here we outline the key challenges we have identified. However, this list is not intended to be exhaustive. The biggest risks to our estimates are related to the clinical development uncertainties and the potential for prolonged study timelines, which could increase the need for additional financing.

#### Clinical development risks

Investing in pharmaceutical development companies carries significant risk, including the possibility of negative clinical study results, which could lead to the discontinuation of a project and a complete loss of its value. However, we see a slightly lower risk than usual for Initiator's projects, as the two projects on which we base our valuation have been evaluated in Phase I clinical studies, providing a better understanding of their safety and tolerability.

#### Financial risks

Initiator Pharma has recurring capital needs, despite maintaining a very lean and cost-effective organisation. As its projects advance through clinical development, operating costs typically increase. We believe that the current financing, together with proceeds from the upcoming preferential rights issue, should provide sufficient funding to support operations into 2027. In our estimates we have also included a capital raise in 2028 of DKK30m.

#### Regulatory hurdles

The pharmaceutical market is highly regulated across all major regions. To bring a product to market, extensive clinical testing is required to demonstrate both efficacy and a manageable safety profile. However, once approved, the clinical data package not only supports commercialisation but also helps maintain exclusivity against competition.

#### Commercialisation risks

The company's most advanced projects target major primary care indications. We believe a partnership or collaboration with a strong industry player will be crucial for a successful product launch.

#### Competition risks

Even though ED is prevalent, competition from other drugs in development remains low. However, while pudafensine and IP2018 target patients who do not respond to existing PDE5 inhibitors, these established drugs set a high bar for success.

DNB Carnegie Investment Bank AB is a bank incorporated in Sweden with limited liability and is authorised and regulated by the Swedish Financial Supervisory Authority. DNB Carnegie Investment Bank AB is established in the UK kia its UK branch which is authorised and regulated by the UK Financial Conduct Authority (FCA). DNB Carnegie Investment Bank AB is established in Finland and Denmark via its Finland and Denmark branches which are subject to limited supervision by the respective national Supervisory Authorities.

Further details about the extent of regulation by local authorities outside Norway and Sweden are available on request.

#### Property rights

This research report is for clients only, and not for publication, and has been prepared for information purposes by DNB Carnegie.

This research report is the property of DNB Carnegie. DNB Carnegie retains all intellectual property rights (including, but not limited to, copyright) relating to this research report. Sell-side investment firms are not allowed any commercial use (including, but not limited to, reproduction and redistribution) of this research report contents, either partially or in full, without DNB Carnegie's explicit and prior written consent. However, buy-side investment firms may use this research report when making investment decisions, and may also base investment advice given to clients on this research report. Such use is dependent on the buy-side investment firm citing DNB Carnegie as the source.

#### The Report does not constitute investment advice

This research report is made for information purposes only, and does not constitute and should not in any way be considered as an offer to buy or sell any securities or other financial instruments or to participate in any investment strategy. This research report has been prepared as general information and is therefore not intended as a personal recommendation of particular financial instruments or strategies, and does not constitute personal investment advice. Investors should therefore make their own assessments of whether any of the trading ideas described herein are a suitable investment based on the investor's knowledge and experience, financial situation, and investment objectives.

#### Risk warning

The risk of investing in financial instruments is generally high. Past performance is not a reliable indicator of future performance, and estimates of future performance are based on assumptions that may not be realised. When investing in financial instruments, the value of the investment may increase or decrease, and the investor may lose all or part of their investment. Careful consideration of possible financial distress should be made before investing in any financial instrument.

#### Analyst certification

The research analyst(s) responsible for the content of this research report certify that: 1) the views expressed in this research report accurately reflect that research analyst's personal views about the company and the securities that are the subject of this research report; and 2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this research report. DNB Carnegie employees, including research analysts, may receive compensation that is generated by overall firm profitability.

#### Type of coverage, including valuation methodologies and assumptions

1. Fundamental analysis with a target price and recommendation. DNB Carnegie publishes a target price for most of the stocks in our Research Universe. The target price is the analyst's assessment of expected total return (including dividend per share) over the coming 12 months based on various fundamental valuation methods. The target price is based on a combination of several valuation methods such as discounted cash flow, pricing based on earnings multiples, multiple on book value, net asset value and peer comparison. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers to obtain a target price. For companies where it is appropriate, a target price can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Target prices are revised when earnings and cash flow forecasts are changed. Thus, changes to estimates are a key risk to the target price. Other reasons for revising target prices include changes in the underlying value of a company's assets and when factors affecting the required rate of return change, which can also be seen as risk factors to the target price.

2. Quantitative and technical analysis. DNB Carnegie produces research based on quantitative and technical analysis ("quant products"). Such research is based on mathematical and technical models applied to companies, industries and sectors, rather than a fundamental analysis of a company. Quantitative and technical analysis thus does not result in estimates, a valuation or a recommendation (e.g. BUY, SELL, HOLD). Quant products may also have a significantly different time horizon from those of other products generated by DNB Carnegie. The views expressed in quant products may thus differ from, or conflict with, those presented in other research reports generated by DNB Carnegie.

3. Commissioned research reports include the analyst's assessment of a fair value range over the coming 6-12 months based on various fundamental valuation methods. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers. For companies where it is appropriate, a fair value range can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Fair value ranges represent the assessment of the analyst(s) at the time of writing.

You will find detailed information about the valuation or methodology, the underlying assumptions, and risks on DNB Carnegie Edge (www.edge.carnegie.se). The complete history of equity research reports and previous recommendations can also be found on DNB Carnegie Edge and here.

#### Frequency of update

DNB Carnegie's research analysis consists of case-based analyses, meaning the frequency of the analytical research report may vary over time. Unless otherwise expressly stated in this research report, the analysis is updated when considered necessary by the research department, for example in the event of significant changes in market conditions or events related to the issuer/the financial instrument.

### DNB Carnegie® Access

#### Initiator Pharma

#### Potential conflicts of interest

DNB Carnegie may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any company mentioned in this research report. Any such publicly announced business activity during the past 12 months will be referred to in the company-specific disclosures.

DNB Bank ASA, its affiliates and subsidiaries are engaged in commercial banking activities, and may for example be a lender to any company mentioned in this research report. This means that certain parts of these entities might have access to whatever rights and information regarding addressed companies as are available to a creditor under applicable law and the applicable loan and credit agreements.

A set of rules handling conflicts of interest is implemented in DNB Carnegie and the rest of DNB Bank ASA, this includes confidentiality rules restricting the exchange of information between various parts of DNB Carnegie and the rest of DNB Bank ASA. The Investment Banking Division and other business departments in DNB Carnegie and DNB Bank ASA are surrounded by information barriers to restrict the flows of sensitive information. People outside an information barrier may gain access to sensitive information only after having observed applicable wall-crossing procedures. This means that employees of DNB Carnegie who are preparing this research report are prevented from using or being aware of information available in other parts of DNB Carnegie or DNB Bank ASA that may be relevant to the recipients' decisions.

The remuneration of employees involved in preparing this research report is not tied to investment banking transactions performed by DNB Carnegie or a legal person within the same group.

Confidential and non-public information regarding DNB Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner. Internal guidelines are implemented to ensure the integrity and independence of research analysts. In accordance with the guidelines, the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues: contacts with covered companies, prohibition against offering favourable recommendations, personal involvement in covered companies, participation in investment banking activities, supervision and review of research reports, analyst reporting lines, and analyst remuneration.

DNB Carnegie and any of its officers or directors may have a position, or otherwise be interested in, transactions in securities that are directly or indirectly the subject of this research report. Any significant financial interests held by the analyst, DNB Carnegie, or a legal person in the same group in relation to the issuer will be referred to in the company-specific disclosures.

#### Other material conflicts of interest: Commissioned Research

This research report was commissioned and sponsored by the issuer (issuer-paid research) and should therefore be considered marketing communication (i.e. not investment research).

Payment for this research report has been agreed in advance on a non-recourse basis. As commissioned research, this research report can be considered an acceptable minor non-monetary benefit under MiFID II. It has not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, it is still subject to the same confidentiality rules and sound research principles.

Commissioned research is intended only for distribution to professional investors. Such investors are expected to make their own investment decisions without undue reliance on this research report.

#### Company specific disclosures

The following disclosures relate to relationships between DNB Carnegie Investment Bank AB (with its subsidiaries, "DNB Carnegie") and the subject company.

Please see https://edge.carnegie.se/legal/disclosuresanddisclaimers for equity disclosures and historical recommendation and target price information on all companies covered by DNB Carnegie.

#### Additional information for clients in Australia

This research report has been prepared and issued outside Australia.

DNB Bank ASA ARBN 675 447 702 is exempt from the requirement to hold an Australian financial services licence under the Corporations Act 2001 (Cth) ("Corporations Act") in respect of financial services it provides to "wholesale clients" within the meaning of the Corporations Act ("Wholesale Clients"). DNB Bank ASA accordingly does not hold an Australian financial services licence. DNB Bank ASA is regulated by Finanstilsynet (the Financial Supervisory Authority of Norway) under the laws of Norway, which differ from Australian laws.

This research report is provided only to authorised recipients who are both Wholesale Clients and "professional investors" within the meaning of the Corporations Act. In no circumstances may this research report be provided to any other person.

No member of the DNB Group, including DNB Bank ASA and DNB Carnegie Investment Bank AB, is an authorised deposit-taking institution ("ADI") under the Banking Act 1959 (Cth). Accordingly, neither DNB Bank ASA nor DNB Carnegie Investment Bank AB is supervised by the Australian Prudential Regulation Authority as an ADI.

DNB Bank ASA is a limited liability company incorporated in Norway.

Nothing in this research report excludes, restricts or modifies a statutory warranty or liability to the extent such an exclusion, restriction or modification would be prohibited under Australian law.

#### Additional information for clients in Canada

This research report and the information included herein is general investment advice that is not tailored to the needs of any recipient and, accordingly, is distributed to Canadian residents in reliance on section 8.25 of the Canadian Securities Administrators' National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. For disclosures regarding any financial or other interest that DNB Bank ASA, DNB Carnegie Investment Bank AB and their affiliates may have in the issuer or issuers that are the subject of this research report please see the potential conflict of interest section and the company-specific disclosures section.

#### Additional information for clients in Singapore

This research report is distributed by the Singapore Branch of DNB Bank ASA. It is intended for general circulation and does not take into account the specific investment objectives, financial situation or particular needs of any particular person. Please seek advice from a financial adviser regarding the suitability of any product referred to in this research report, taking into account your specific financial objectives, financial situation or particular needs before making a commitment to purchase any such product. You have received a copy of this research report because you have been classified as an accredited investor, an expert investor, or as an institutional investor, as these terms have been defined under Singapore's Financial Advisers Act (Cap. 110) ("FAA") and/or the Financial Advisers Regulations ("FAR"). The Singapore Branch of DNB Bank ASA is a financial adviser exempt from licensing under the FAA but is otherwise subject to the legal requirements of the FAA and of the FAR. By virtue of your status as an accredited investor, institutional investor or as an expert investor, the Singapore Branch of DNB Bank ASA is, in respect of certain of its dealings with you or services rendered to you, exempt from having to comply with certain regulatory requirements of the FAA and FAR, including without limitation, sections 34, 36 and 45 of the FAA. Section 34 of the FAA requires a financial adviser to disclose material information concerning designated investment products that are recommended by the financial adviser to you as the client. Section 36 of the FAA requires a financial adviser to have a reasonable basis for making investment recommendations to you as the client. Section 45 of the FAA requires a financial adviser to include, within any circular or written communications in which they make recommendations concerning securities, a statement of the nature of any interest which the financial adviser (and any person connected or associated with the financial adviser) might have in the securities. Please contact the Singapore branch of DNB Bank ASA at +65 6260 0111 in respect of any matters arising from, or in connection with, this research report. This research report is intended for and is to be circulated only to people who are classified as an accredited investor, an expert investor, or an institutional investor. If you are not an accredited investor, an expert investor or an institutional investor, please contact the Singapore Branch of DNB Bank ASA at +65 6260 0111. We, DNB Bank ASA, its affiliates and subsidiaries, our associates, officers and/or employees may have interests in any products referred to in this research report by acting in various roles including as distributor, holder of principal positions, adviser or lender. We, DNB Bank ASA, its affiliates, subsidiaries, our associates, officers and/or employees may receive fees, brokerage or commissions for acting in those capacities. In addition, we, DNB Bank ASA, its affiliates and subsidiaries, our associates, officers and/or employees may buy or sell products as principal or agent and may effect transactions that are not consistent with the information set out in this research report.

#### Additional information for clients in United States

The research analyst(s) named on this research report are foreign research analysts as defined by FINRA Rule 1220. The only affiliates contributing to this research report are the investment services division of DNB Bank ASA and DNB Carnegie Investment Bank AB (a wholly owned subsidiary of DNB Bank ASA) ("hereinafter DNB Carnegie"); the foreign research analysts employed by DNB Carnegie are named on the first page; the foreign research analysts are not registered/qualified as research analysts with FINRA; foreign research analysts are not associated persons of DNB Markets, Inc. or Carnegie, Inc. and therefore are not subject to the restrictions set forth in FINRA Rules 2241 and 2242 regarding restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

This is a Third Party Research Report as defined by FINRA Rules 2241 and 2242. Any material conflict of interest that can reasonably be expected to have influenced the choice of DNB Carnegie as a research provider or the subject Company of a DNB Carnegie research report, including the disclosures required by FINRA Rules 2241 and 2242 can be found above.

This research report is being furnished solely to Major U.S. Institutional Investors within the meaning of Rule 15a-6 under the U.S. Securities Exchange Act of 1934 and to such other U.S. Institutional Investors as DNB Markets, Inc. or Carnegie, Inc. may determine. Distribution to non-Major U.S. Institutional Investors will be made only by DNB Markets, Inc. or Carnegie, Inc., sparately incorporated subsidiaries of DNB Bank ASA that are U.S. broker-dealers and members of the Financial Industry Regulatory Authority ("FINRA") and the Securities Investor Protection Corporation ("SIPC").

Any U.S. recipient of this research report seeking to obtain additional information or to effect any transaction in any security discussed herein or any related instrument or investment should contact DNB Markets, Inc., 30 Hudson Yards, 81st Floor, New York, NY 10001, telephone number +1 212-551-9800, or Carnegie Inc, 20 West 55th St., New York, NY 10019, telephone number +1 212-262-5800.

At DNB Carnegie, we are dedicated to being the most respected partner for Nordic investment banking and wealth management solutions, leveraging the full capabilities of DNB. With unmatched strength across products, sectors, and geographies, our commitment is crystal clear: Clients first!

We deliver tailored financial solutions in mergers and acquisitions, capital markets, and financial advisory services by leveraging our deep market knowledge and expansive international reach. As an agile investment bank and part of a major Nordic banking group, we offer unparalleled local expertise, exceptional placing power, and a unique network.

Our roots run deep in the Nordic region, with strong local offices in Sweden, Norway, Denmark, and Finland.

This solid foundation is amplified by our global presence in London, New York, and Singapore.
