Shift in B2B agreements changes profitability – Q1 review

Angler gaming has made changes to its revenue model in the B2B segment, resulting in lower revenue but higher profitability than our estimates. This shift is reflected in our estimate changes, and we argue that the change supports our equity story of a multiple expansion.

**Numbers reflect change in revenue model for B2B.** Revenue in Q1 2025 was EUR8.2m, equivalent of a 24.8% Y/Y decline and 24% below our estimate. EBIT came in at EUR1.7m, corresponding to a margin of 21.2% and 20% above our estimate. A major reason for the deviation is a shift in the revenue model for the B2B business, resulting in a higher gross margin but lower revenue. The trading update for Q2 2025 indicates 16% lower daily revenue than the daily average for Q2 2024. We believe that the reported numbers support our equity story.

Adjustments to reflect shift in revenue model. Given the renegotiation of the B2B agreement we lower our 2025 revenue estimate by 19%. For 2026–27 we lower our estimates by an average of 15% because of the lower revenue base. We increase our 2025–27e gross margin to an average of 41.0% from 35.4% because of the B2B agreement renegotiation. As a result our EBIT estimates increase by 4% for 2025 and an average of 5% for 2026–27e. The larger changes in our EPS estimates versus our EBIT forecasts are due to Angler Gaming now being debt free.

**Q1 result confirms our equity story**: We believe that the profitability growth in the quarter confirm our equity story.

**Updated valuation methodology.** We have changed our valuation approach from a DCF to a multiple-based methodology. This results in a minor fair value range adjustment to SEK5.9–7.4. (5.5–7.5)

| Equity story              |  |
|---------------------------|--|
| Near term:<br>within 12M  | We argue that the main catalyst for the Angler Gaming share price is a continuous strong operational performance. We believe the company can be<br>agile and find new opportunities in the global igaming market. One potential catalyst for the share price could be if PremierGaming, the subsidiary<br>focusing on regulated markets, shows a high growth rate. This since regulated revenue tends to be valued at a premium by the market. |
| Long term<br>outlook: 5Y+ | We believe that the long-term investment case in Angler Gaming is the shift from offline to online gambling. As the online market grows, driven by behavioural and regulatory shifts, so does the market for online operators.   |
|                           |  |
| Key risks:                | • Since we have limited knowledge of Angler Gaming's geographic exposure, we see a risk for revenue from jurisdictions where online gambling is prohibited.  |
|                           | • Due to the limited information about geographical exposure, we deem there to be certain foreign exchange risks   |
|                           | • Increased local regulations can affect margins in the short term   |

### Valuation and methodology

We have changed our valuation methodology from a DCF to a peer-based valuation, using EV/EBIT 2026e. The low end of the fair value range is determined by looking Angler Gaming's historical EV/EBIT NTM valuation for 2020-25, and applying a 40% discount because of lower growth in our estimates than the historical numbers. For the high end of the fair value range we have used the median valuation during the same time span of Angler Gaming's closet peer, Betsson, and applied a 30% discount to reflect a lower share of revenue from regulated markets.

customer intake in short run

#### Fair value range 12M

The main driver towards the higher end of fair value range is a continuous improvement in operational KPIs, indicating that the turnaround for Angler Gaming is continuous. In this scenario, we see growth from regulated markets as higher than grey markets. The main driver towards the lower end of our fair value range is continuous growth but where grey markets grow at a higher rate than regulated markets.

#### Risks

**Grey market risk:** Since we have a limited knowledge on what markets the majority of Angler Gaming's revenue originates, we see it as a potential risk that it could lose revenue due to regulation, being geo-blocked or for other reasons cease to operate in certain markets.

**FX risk**: We believe is a plausible assumption to make that Angler Gaming has revenue in other currencies than euro which is the reporting currency. This could give rise to an increased volatility.

**Increased local regulation**: While we see an increased regulation of the igaming market as a positive long-term trend, increasing to conversion from offline to online gambling. However, change in regulations regarding marketing or tax rate could potentially affect revenues in the short term.

#### **Property rights**

This research report is for clients only, and not for publication, and has been prepared for information purposes by DNB Carnegie.

This research report is the property of DNB Carnegie. DNB Carnegie retains all intellectual property rights (including, but not limited to, copyright) relating to this research report. Sell-side investment firms are not allowed any commercial use (including, but not limited to, reproduction and redistribution) of this research report contents, either partially or in full, without DNB Carnegie's explicit and prior written consent. However, buy-side investment drives given to clients on this research report. Such use is dependent on the buy-side investment firm citing DNB Carnegie as the source.

#### The Report does not constitute investment advice

This research report is made for information purposes only, and does not constitute and should not in any way be considered as an offer to buy or sell any securities or other financial instruments or to participate in any investment strategy. This research report has been prepared as general information and is therefore not intended as a personal recommendation of particular financial instruments or strategies, and does not constitute personal investment advice. Investors should therefore make their own assessments of whether any of the trading ideas described herein are a suitable investment based on the investor's knowledge and experience, financial situation, and investment objectives.

#### Risk warning

The risk of investing in financial instruments is generally high. Past performance is not a reliable indicator of future performance, and estimates of future performance are based on assumptions that may not be realised. When investing in financial instruments, the value of the investment may increase or decrease, and the investor may lose all or part of their investment. Careful consideration of possible financial distress should be made before investing in any financial instrument.

#### Analyst certification

The research analyst(s) responsible for the content of this research report certify that: 1) the views expressed in this research report accurately reflect that research analyst's personal views about the company and the securities that are the subject of this research report; and 2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analysts in this research or the report. DNB Carnegie employees, including research analysts, may receive compensation that is generated by overall firm profitability.

#### Type of coverage, including valuation methodologies and assumptions

1. Fundamental analysis with a target price and recommendation. DNB Carnegie publishes a target price for most of the stocks in our Research Universe. The target price is the analyst's assessment of expected total return (including dividend per share) over the coming 12 months based on various fundamental valuation methods. The target price is based on a combination of several valuation methods such as discounted cash flow, pricing based on earnings multiples, multiple on book value, net asset value and peer comparison. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers to obtain a target price. For companies where it is appropriate, a target price can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Target prices are revised when earnings and cash flow forecasts are changed. Thus, changes to estimates are a key risk to the target price. Other reasons for revising target prices include changes in the underlying value of a company's assets and when factors affecting the required rate of return change, which can also be seen as risk factors to the target price.

2. Quantitative and technical analysis. DNB Carnegie produces research based on quantitative and technical analysis ("quant products"). Such research is based on mathematical and technical models applied to companies, industries and sectors, rather than a fundamental analysis of a company. Quantitative and technical analysis thus does not result in estimates, a valuation or a recommendation (e.g. BUY, SELL, HOLD). Quant products may also have a significantly different time horizon from those of other products generated by DNB Carnegie. The views expressed in quant products may thus differ from, or conflict with, those presented in other research reports generated by DNB Carnegie.

3. Commissioned research reports include the analyst's assessment of a fair value range over the coming 6-12 months based on various fundamental valuation methods. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers. For companies where it is appropriate, a fair value range can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Fair value ranges represent the assessment of the analyst(s) at the time of writing.

You will find detailed information about the valuation or methodology, the underlying assumptions, and risks on DNB Carnegie Edge (www.edge.carnegie.se). The complete history of equity research reports and previous recommendations can also be found on DNB Carnegie Edge and here.

#### Frequency of update

DNB Carnegie's research analysis consists of case-based analyses, meaning the frequency of the analytical research report may vary over time. Unless otherwise expressly stated in this research report, the analysis is updated when considered necessary by the research department, for example in the event of significant changes in market conditions or events related to the issuer/the financial instrument.

#### Potential conflicts of interest

DNB Carnegie may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any company mentioned in this research report. Any such publicly announced business activity during the past 12 months will be referred to in the company-specific disclosures.

DNB Bank ASA, its affiliates and subsidiaries are engaged in commercial banking activities, and may for example be a lender to any company mentioned in this research report. This means that certain parts of these entities might have access to whatever rights and information regarding addressed companies as are available to a creditor under applicable law and the applicable loan and credit agreements.

A set of rules handling conflicts of interest is implemented in DNB Carnegie and the rest of DNB Bank ASA, this includes confidentiality rules restricting the exchange of information between various parts of DNB Carnegie and the rest of DNB Bank ASA. The Investment Banking Division and other business departments in DNB Carnegie and DNB Bank ASA are surrounded by information barriers to restrict the flows of sensitive information. People outside an information barrier may gain access to sensitive information only after having observed applicable wall-crossing procedures. This means that employees of DNB Carnegie who are preparing this research report are prevented from using or being aware of information available in other parts of DNB Carnegie or DNB Bank ASA that may be relevant to the recipients' decisions.

The remuneration of employees involved in preparing this research report is not tied to investment banking transactions performed by DNB Carnegie or a legal person within the same group.

Confidential and non-public information regarding DNB Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner. Internal guidelines are implemented to ensure the integrity and independence of research analysts. In accordance with the guidelines, the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues: contacts with covered companies, prohibition against offering favourable recommendations, personal involvement in covered companies, participation in investment banking activities, supervision and review of research reports, analyst reporting lines, and analyst remuneration.

DNB Carnegie and any of its officers or directors may have a position, or otherwise be interested in, transactions in securities that are directly or indirectly the subject of this research report. Any significant financial interests held by the analyst, DNB Carnegie, or a legal person in the same group in relation to the issuer will be referred to in the company-specific disclosures.

#### Other material conflicts of interest: Commissioned Research

This research report was commissioned and sponsored by the issuer (issuer-paid research) and should therefore be considered marketing communication (i.e. not investment research).

Payment for this research report has been agreed in advance on a non-recourse basis. As commissioned research, this research report can be considered an acceptable minor nonmonetary benefit under MiFID II. It has not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, it is still subject to the same confidentiality rules and sound research principles.

Commissioned research is intended only for distribution to professional investors. Such investors are expected to make their own investment decisions without undue reliance on this research report.

#### Company specific disclosures

The following disclosures relate to relationships between DNB Carnegie Investment Bank AB (with its subsidiaries, "DNB Carnegie") and the subject company.
