COMPANY UPDATE Software & Services

Sileon

Proposed merger with Omnio terminated

Following the termination of the proposed merger with Omnio, we have lowered our fair value to SEK3.5–5.2 (9.4–13.1).

Prolonged due diligence process with Omnio ended in termination... At the end of March, Sileon announced that it and Omnio had signed a letter of intent regarding a reverse takeover. This was followed by an announcement that the due diligence process has led to a mutual agreement not to proceed with the proposed merger.

...due to the complexity of the transaction. The reverse takeover, valuations, and necessary approvals from other entities made the transaction complex, with limited visibility on the timing for closing.

Timing for closing a critical factor. We saw a good business fit between the two companies, where Sileon's SaaS BNPL product would complement Omnio's BaaS offering. However, neither of the two companies is profitable. While we do not know Omnio's financial status, we believe its cash flow would unlikely have been sufficient to fund Sileon's expansion in the next year.

Fair value cut to SEK3.5–5.2. We note Sileon is in a start-up phase and management has communicated a need to strengthen its cash position. At the same time, while terminated, the proposed deal with Omnio suggests some actors could be willing to value Sileon's technology at EUR5m. However, given the need to strengthen its cash position, we believe this will likely be diluted by an increased number of shares in the future. Given these uncertainties, we apply a discount to 2027e EV/sales. Our fair value range corresponds to a 2027e EV/sales of 0.4–0.6x, compared to a peer group of Swedish tech companies trading at a median of 1.8x and an average of 2.4x, reflecting the risks related to the company's cash position.

Sileon

| Equity story | |
|---------------------------|--|
| Near term: within 12M | Over the past year, Sileon has refined its sales strategy, targeting potential customers with modern tech stacks, which offer shorter decision-making and implementation timelines. In the near term, securing new customer contracts remains the top priority. The business and organisation have been optimised for its new operation, and given Sileon's highly scalable product, driving revenue growth is the key. |
| Long term outlook: 5Y+ | Buy Now, Pay Later (BNPL) as a payment solution is particularly popular among younger generations, as it offers transparent costs and greater flexibility. Additionally, the global shift toward digital payments is a key driver behind the increasing adoption of BNPL. For Sileon, which has developed a quite unique BNPL platform, the priority now is to secure new customers to demonstrate the platform's value. Many credit providers, including banks, rely on outdated legacy systems, making it both time-consuming and costly to develop similar BNPL functionalities in-house. Sileon's solution eliminates these barriers, offering a seamless, cost-efficient alternative. |
| Key risks: | Cash position. New customers. Competing technologies and alternative solutions. |
| | |

Company description

Sileon has developed a rather unique BNPL (Buy Now Pay Later) software program, simplifying the process for banks and credit companies to offer BNPL services to their customers. The platform is fully automated, enabling high scalability and the potential for strong margins as revenue grows.

Key industry drivers

- Growing share of digital payments.
- Rising adoption of BNPL.
- Increasing number of companies providing credit.

Key peers

Industry outlook

According to market data from FIS Global, BNPL is among the fastest-growing payment solutions and is projected to account for 5% of all transactions by 2027. As payments shift from cash to digital, BNPL adoption continues to rise.

| Largest shareholders, c | apital |
|-------------------------|--------|
|-------------------------|--------|

| Rieber & Son | 44.5% |
|------------------------|-------|
| Kent Hansson | 11.9% |
| Movestic Livförsäkring | 7.5% |

Cyclicality

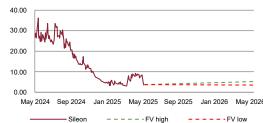

Cyclicality: N/A

As Sileon is a tech company, we find Swedish tech firms such as Acast, Sinch, and Physitrack to be the most relevant comparisons. However, given that Sileon's product is globally scalable and operates within the payments sector, we also see global fintech companies like Visa, Mastercard, and PayPal as fitting benchmarks in the future.

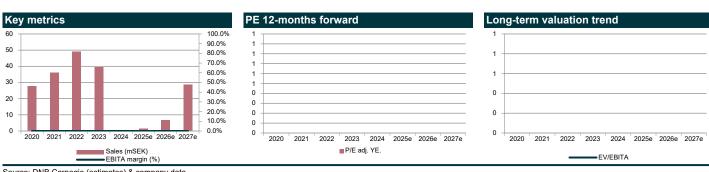

Valuation and methodology

Since Sileon is still in the early stages of its new strategic direction, we find it challenging to evaluate the company. Therefore, we have applied a scenario analysis, assessing a base-case scenario, a low-growth scenario, and a high-growth scenario, all based on sales projections for 2027e, as this is when we expect the company to achieve substantial revenue generation. Our base-case scenario is aligned with our current estimates, while the low-growth scenario assumes fewer customer acquisitions than expected, leading to lower transaction volumes. Conversely, the high-growth scenario reflects a more favourable outcome, where Sileon outperforms expectations. We see the high-growth scenario as feasible, as it would only take securing 4-6 larger customers to reach those projections.

Fair value range 12M

We see news about new customer acquisitions as the most critical factor for the stock in the coming years. Additionally, a smooth integration with Areeba and the first transactions made by its customers will be key milestones we look for in 2025. On the downside, the main risk remains the company's cash position and the uncertainty surrounding how it will be managed.

Source: DNB Carnegie (estimates) & company data

Valuation

Evaluating Sileon is challenging at this stage, as the company is still in the early phases of its new strategic direction and has also communicated a need for additional funding. As a result, there are some uncertainties surrounding the company, making valuation more complex.

Since we do not yet know how, when, or under what conditions Sileon will strengthen its cash position, we have not factored this into our estimates. Instead, we account for this by applying a discount to the valuation compared to peers. Our fair value of SEK3.5–5.2 corresponds to a 2027e EV/sales of 0.4–0.6x, compared to a peer group of Swedish tech companies trading at a median of 1.8x and an average of 2.4x.

Assumptions

Given the challenges in making precise estimates for Sileon, we have valued the company using a scenario analysis. This includes a base-case scenario based on our estimates, a lowgrowth, low-margin scenario where customer acquisition falls short of expectations, and a highgrowth scenario where both customer inflow and transaction volume exceed our current projections.

When valuing Sileon, we find smaller Swedish tech companies to be the most relevant peers. However, these companies are generally larger, profitable, and have more established business models. Due to these factors, along with the uncertainty surrounding Sileon's cash position, we believe the company should trade at a discount to peers. On the other hand, Sileon's product is more globally scalable than several of the comparable listed below, which could present long-term upside potential. In the long term, as Sileon achieves profitability with a globally scalable product in the fintech sector, we believe it could also be compared to global payment and fintech companies.

Note: Estimates collected from Factset as per 23/05/2025

Since we do not expect substantial revenue until 2027, we consider this the most relevant year for evaluating Sileon. In our base-case scenario, we apply our estimates and a 2027e EV/sales of 0.4–0.6x, using the current number of shares of 3.3m, to arrive at a fair value range of SEK3.5–5.2. The peer group is trading at a median multiple of 1.8x and an average of 2.4x for the same period. However, as Sileon is not yet profitable, we believe the stock should trade at a discount. Additionally, with uncertainty surrounding the cash position, there is a risk of a share issuance, which we believe could potentially more than double the number of outstanding shares. To account for this dilution risk, we apply a conservatively low valuation multiple for the period.

In our low-growth scenario, Sileon adds fewer customers than expected, resulting in a lower number of transactions compared to our base-case estimates. In this scenario, we assume a 2027e EV/sales of 0.3–0.5x to reflect the lower margin and heightened financial risk, indicating a fair value range of SEK1.2–2.0.

In our high-growth scenario, Sileon secures more customers, leading to a higher number of transactions than we currently expect. Depending on the type of customers added, we see this scenario as fully plausible. For example, our revenue estimate for the partnership with Areeba suggests potential annual revenues of SEK12.5m per year. To reach our sales estimates, Sileon would need to sign approximately four similar customers in 2025 and 2026. In this scenario, we assume the same opex levels as in our base scenario, highlighting the potential scalability of the business. Under these conditions, we apply a multiple of 0.7–1.0x, leading to a high-growth fair value range of SEK9.6–13.7.

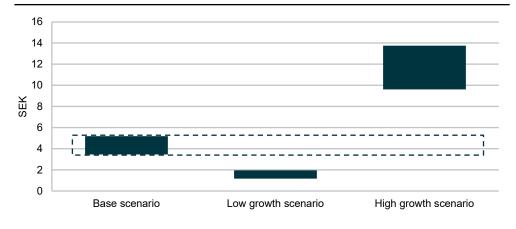

Sileon

Disclosures and disclaimers

DNB Carnegie

DNB Carnegie is a Business Area in the DNB Group comprising: 1) the investment services division of DNB Bank ASA; 2) DNB Carnegie Investment Bank AB (a wholly owned subsidiary of DNB Bank ASA); 3) DNB Markets, Inc. (a wholly owned subsidiary of DNB Bank ASA) and 4) Carnegie, Inc. (a wholly owned subsidiary of DNB Carnegie Investment Bank AB). DNB Carnegie is a leading, Nordic provider of investment banking services.

DNB Carnegie generates added value for institutions, companies and private clients in the areas of trade in securities, investment banking, and securities services.

The research in DNB Carnegie is produced in the investment services division of DNB Bank ASA and DNB Carnegie Investment Bank AB, thus DNB Carnegie should be read as meaning these two entities throughout the disclaimer text.

General

This research report has been prepared by DNB Carnegie and is based on information obtained from various public sources that DNB Carnegie believes to be reliable but has not independently verified, and DNB Carnegie makes no guarantee, representation or warranty as to its accuracy or completeness.

This research report does not, and does not attempt to, contain everything material that there is to be said about the company. Any opinions expressed herein reflect DNB Carnegie's judgement at the time this research report was prepared and are subject to change without notice.

DNB Bank ASA, its affiliates and subsidiaries, their directors, officers, shareholders, employees or agents, are not responsible for any errors or omissions, regardless of the cause, or for the results obtained from the use of this research report, and shall in no event be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs) in connection with any use of this research report.

Any use of non-DNB Carnegie logos in this research report is solely for the purpose of assisting in identifying the relevant party. DNB Carnegie is not affiliated with any such party.

DNB Carnegie produces and distributes research reports from 1) the investment services division of DNB Bank ASA; and 2) DNB Carnegie Investment Bank AB (a wholly owned subsidiary of DNB Bank ASA). Clients receiving research reports from DNB Carnegie will therefore receive research reports produced by both companies. This research report is produced in the DNB Carnegie company where the responsible analyst is employed, please see the responsible analyst's name and DNB Carnegie company on the front page under the analyst's name to determine in which DNB Carnegie company this research report is produced.

This research report is distributed in Norway, Singapore and Australia by the investment services division of DNB Bank ASA, in Sweden, Finland and Denmark by DNB Carnegie Investment Bank AB (a wholly owned subsidiary of DNB Bank ASA), and in the US and the UK by the investment services division of DNB Bank ASA and DNB Carnegie Investment Bank AB, respectively.

DNB Carnegie is under supervision

DNB Bank ASA is a bank incorporated in Norway and is authorised and regulated by the Norwegian Financial Supervisory Authority. DNB Bank ASA is established in Singapore and in the UK via its Singapore and UK branches, which are authorised and regulated by the Monetary Authority of Singapore, and on a limited basis by the Financial Conduct Authority and the Prudential Regulation Authority of the UK respectively. DNB Bank ASA is established in Sweden via its Sweden branch which are subject to supervision by the Financial Supervisory Authority of Sweden. DNB Carnegie Investment Bank AB is a bank incorporated in Sweden with limited liability and is authorised and regulated by the Swedish Financial Supervisory Authority. DNB Carnegie Investment Bank AB is established in the UK via its UK branch which is authorised and regulated by the UK Financial Conduct Authority (FCA). DNB Carnegie Investment Bank AB is established in Finland and Denmark via its Finland and Denmark branches which are subject to limited supervision by the respective national Supervisory Authorities.

Further details about the extent of regulation by local authorities outside Norway and Sweden are available on request.

Property rights

This research report is for clients only, and not for publication, and has been prepared for information purposes by DNB Carnegie.

This research report is the property of DNB Carnegie. DNB Carnegie retains all intellectual property rights (including, but not limited to, copyright) relating to this research report. Sell-side investment firms are not allowed any commercial use (including, but not limited to, reproduction and redistribution) of this research report contents, either partially or in full, without DNB Carnegie's explicit and prior written consent. However, buy-side investment drives given to clients on this research report. Such use is dependent on the buy-side investment firm citing DNB Carnegie as the source.

The Report does not constitute investment advice

This research report is made for information purposes only, and does not constitute and should not in any way be considered as an offer to buy or sell any securities or other financial instruments or to participate in any investment strategy. This research report has been prepared as general information and is therefore not intended as a personal recommendation of particular financial instruments or strategies, and does not constitute personal investment advice. Investors should therefore make their own assessments of whether any of the trading ideas described herein are a suitable investment based on the investor's knowledge and experience, financial situation, and investment objectives.

Risk warning

The risk of investing in financial instruments is generally high. Past performance is not a reliable indicator of future performance, and estimates of future performance are based on assumptions that may not be realised. When investing in financial instruments, the value of the investment may increase or decrease, and the investor may lose all or part of their investment. Careful consideration of possible financial distress should be made before investing in any financial instrument.

Analyst certification

The research analyst(s) responsible for the content of this research report certify that: 1) the views expressed in this research report accurately reflect that research analyst's personal views about the company and the securities that are the subject of this research report; and 2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analysts in this research DNB Carnegie employees, including research analysts, may receive compensation that is generated by overall firm profitability.

Type of coverage, including valuation methodologies and assumptions

1. Fundamental analysis with a target price and recommendation. DNB Carnegie publishes a target price for most of the stocks in our Research Universe. The target price is the analyst's assessment of expected total return (including dividend per share) over the coming 12 months based on various fundamental valuation methods. The target price is based on a combination of several valuation methods such as discounted cash flow, pricing based on earnings multiples, multiple on book value, net asset value and peer comparison. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers to obtain a target price. For companies where it is appropriate, a target price can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Target prices are revised when earnings and cash flow forecasts are changed. Thus, changes to estimates are a key risk to the target price. Other reasons for revising target prices include changes in the underlying value of a company's assets and when factors affecting the required rate of return change, which can also be seen as risk factors to the target price.

2. Quantitative and technical analysis. DNB Carnegie produces research based on quantitative and technical analysis ("quant products"). Such research is based on mathematical and technical models applied to companies, industries and sectors, rather than a fundamental analysis of a company. Quantitative and technical analysis thus does not result in estimates, a valuation or a recommendation (e.g. BUY, SELL, HOLD). Quant products may also have a significantly different time horizon from those of other products generated by DNB Carnegie. The views expressed in quant products may thus differ from, or conflict with, those presented in other research reports generated by DNB Carnegie.

3. Commissioned research reports include the analyst's assessment of a fair value range over the coming 6-12 months based on various fundamental valuation methods. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers. For companies where it is appropriate, a fair value range can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Fair value ranges represent the assessment of the analyst(s) at the time of writing.

You will find detailed information about the valuation or methodology, the underlying assumptions, and risks on DNB Carnegie Edge (www.edge.carnegie.se). The complete history of equity research reports and previous recommendations can also be found on DNB Carnegie Edge and here.

Frequency of update

DNB Carnegie's research analysis consists of case-based analyses, meaning the frequency of the analytical research report may vary over time. Unless otherwise expressly stated in this research report, the analysis is updated when considered necessary by the research department, for example in the event of significant changes in market conditions or events related to the issuer/the financial instrument.

Potential conflicts of interest

DNB Carnegie may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any company mentioned in this research report. Any such publicly announced business activity during the past 12 months will be referred to in the company-specific disclosures.

DNB Bank ASA, its affiliates and subsidiaries are engaged in commercial banking activities, and may for example be a lender to any company mentioned in this research report. This means that certain parts of these entities might have access to whatever rights and information regarding addressed companies as are available to a creditor under applicable law and the applicable loan and credit agreements.

A set of rules handling conflicts of interest is implemented in DNB Carnegie and the rest of DNB Bank ASA, this includes confidentiality rules restricting the exchange of information between various parts of DNB Carnegie and the rest of DNB Bank ASA. The Investment Banking Division and other business departments in DNB Carnegie and DNB Bank ASA are surrounded by information barriers to restrict the flows of sensitive information. People outside an information barrier may gain access to sensitive information only after having observed applicable wall-crossing procedures. This means that employees of DNB Carnegie who are preparing this research report are prevented from using or being aware of information available in other parts of DNB Carnegie or DNB Bank ASA that may be relevant to the recipients' decisions.

The remuneration of employees involved in preparing this research report is not tied to investment banking transactions performed by DNB Carnegie or a legal person within the same group.

Confidential and non-public information regarding DNB Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner. Internal guidelines are implemented to ensure the integrity and independence of research analysts. In accordance with the guidelines, the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues: contacts with covered companies, participation in investment banking activities, supervision and review of research reports, analyst reporting lines, and analyst remuneration.

DNB Carnegie and any of its officers or directors may have a position, or otherwise be interested in, transactions in securities that are directly or indirectly the subject of this research report. Any significant financial interests held by the analyst, DNB Carnegie, or a legal person in the same group in relation to the issuer will be referred to in the company-specific disclosures.

Other material conflicts of interest: Commissioned Research

This research report was commissioned and sponsored by the issuer (issuer-paid research) and should therefore be considered marketing communication (i.e. not investment research).

Payment for this research report has been agreed in advance on a non-recourse basis. As commissioned research, this research report can be considered an acceptable minor nonmonetary benefit under MiFID II. It has not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, it is still subject to the same confidentiality rules and sound research principles.

Commissioned research is intended only for distribution to professional investors. Such investors are expected to make their own investment decisions without undue reliance on this research report.

Additional information for clients in Australia

This research report has been prepared and issued outside Australia.

DNB Bank ASA ARBN 675 447 702 is exempt from the requirement to hold an Australian financial services licence under the Corporations Act 2001 (Cth) ("Corporations Act") in respect of financial services it provides to "wholesale clients" within the meaning of the Corporations Act ("Wholesale Clients"). DNB Bank ASA accordingly does not hold an Australian financial services licence. DNB Bank ASA is regulated by Finanstilsynet (the Financial Supervisory Authority of Norway) under the laws of Norway, which differ from Australian laws.

This research report is provided only to authorised recipients who are both Wholesale Clients and "professional investors" within the meaning of the Corporations Act. In no circumstances may this research report be provided to any other person.

No member of the DNB Group, including DNB Bank ASA and DNB Carnegie Investment Bank AB, is an authorised deposit-taking institution ("ADI") under the Banking Act 1959 (Cth). Accordingly, neither DNB Bank ASA nor DNB Carnegie Investment Bank AB is supervised by the Australian Prudential Regulation Authority as an ADI.

DNB Bank ASA is a limited liability company incorporated in Norway.

Nothing in this research report excludes, restricts or modifies a statutory warranty or liability to the extent such an exclusion, restriction or modification would be prohibited under Australian law.

Additional information for clients in Canada

This research report and the information included herein is general investment advice that is not tailored to the needs of any recipient and, accordingly, is distributed to Canadian residents in reliance on section 8.25 of the Canadian Securities Administrators' National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. For disclosures regarding any financial or other interest that DNB Bank ASA, DNB Carnegie Investment Bank AB and their affiliates may have in the issuer or issuers that are the subject of this research report please see the potential conflict of interest section and the company-specific disclosures section.

Additional information for clients in Singapore

This research report is distributed by the Singapore Branch of DNB Bank ASA. It is intended for general circulation and does not take into account the specific investment objectives, financial situation or particular needs of any particular person. Please seek advice from a financial adviser regarding the suitability of any product referred to in this research report, taking into account your specific financial objectives, financial situation or particular needs before making a commitment to purchase any such product. You have received a copy of this research report because you have been classified as an accredited investor, an expert investor, or as an institutional investor, as these terms have been defined under Singapore's Financial Advisers Act (Cap. 110) ("FAA") and/or the Financial Advisers Regulations ("FAR"). The Singapore Branch of DNB Bank ASA is a financial adviser exempt from licensing under the FAA but is otherwise subject to the legal requirements of the FAA and of the FAR. By virtue of your status as an accredited investor, institutional investor or as an expert investor, the Singapore Branch of DNB Bank ASA is, in respect of certain of its dealings with you or services rendered to you, exempt from having to comply with certain regulatory requirements of the FAA and FAR, including without limitation, sections 34, 36 and 45 of the FAA. Section 34 of the FAA requires a financial adviser to disclose material information concerning designated investment products that are recommended by the financial adviser to you as the client. Section 36 of the FAA requires a financial adviser to have a reasonable basis for making investment recommendations to you as the client. Section 45 of the FAA requires a financial adviser to include, within any circular or written communications in which they make recommendations concerning securities, a statement of the nature of any interest which the financial adviser (and any person connected or associated with the financial adviser) might have in the securities. Please contact the Sindapore branch of DNB Bank ASA at +65 6260 0111 in respect of any matters arising from, or in connection with, this research report. This research report is intended for and is to be circulated only to people who are classified as an accredited investor, an expert investor, or an institutional investor. If you are not an accredited investor, an expert investor or an institutional investor, please contact the Singapore Branch of DNB Bank ASA at +65 6260 0111. We, DNB Bank ASA, its affiliates and subsidiaries, our associates, officers and/or employees may have interests in any products referred to in this research report by acting in various roles including as distributor, holder of principal positions, adviser or lender. We, DNB Bank ASA, its affiliates, subsidiaries, our associates, officers and/or employees may receive fees, brokerage or commissions for acting in those capacities. In addition, we, DNB Bank ASA, its affiliates and subsidiaries, our associates, officers and/or employees may buy or sell products as principal or agent and may effect transactions that are not consistent with the information set out in this research report.

Additional information for clients in United States

The research analyst(s) named on this research report are foreign research analysts as defined by FINRA Rule 1220. The only affiliates contributing to this research report are the investment services division of DNB Bank ASA and DNB Carnegie Investment Bank AB (a wholly owned subsidiary of DNB Bank ASA) ("hereinafter DNB Carnegie"); the foreign research analysts employed by DNB Carnegie are named on the first page; the foreign research analysts are not registered/qualified as research analysts with FINRA; foreign research analysts are not associated persons of DNB Markets, Inc. or Carnegie, Inc. and therefore are not subject to the restrictions set forth in FINRA Rules 2241 and 2242 regarding restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

This is a Third Party Research Report as defined by FINRA Rules 2241 and 2242. Any material conflict of interest that can reasonably be expected to have influenced the choice of DNB Carnegie as a research provider or the subject Company of a DNB Carnegie research report, including the disclosures required by FINRA Rules 2241 and 2242 can be found above.

This research report is being furnished solely to Major U.S. Institutional Investors within the meaning of Rule 15a-6 under the U.S. Securities Exchange Act of 1934 and to such other U.S. Institutional Investors as DNB Markets, Inc. or Carnegie, Inc. may determine. Distribution to non-Major U.S. Institutional Investors will be made only by DNB Markets, Inc. or Carnegie, Inc., separately incorporated subsidiaries of DNB Bank ASA that are U.S. broker-dealers and members of the Financial Industry Regulatory Authority ("FINRA") and the Securities Investor Protection Corporation ("SIPC").

Any U.S. recipient of this research report seeking to obtain additional information or to effect any transaction in any security discussed herein or any related instrument or investment should contact DNB Markets, Inc., 30 Hudson Yards, 81st Floor, New York, NY 10001, telephone number +1 212-551-9800, or Carnegie Inc, 20 West 55th St., New York, NY 10019, telephone number +1 212-262-5800.

At DNB Carnegie, we are dedicated to being the most respected partner for Nordic investment banking and wealth management solutions, leveraging the full capabilities of DNB. With unmatched strength across products, sectors, and geographies, our commitment is crystal clear: Clients first!
