Y/Y improvement on all fronts – Q2 review

Bokusgruppen reported solid Y/Y improvements in top-line growth, gross margin, EBIT and cash flow in the seasonally weak Q2. The Y/Y organic growth was the bright spot, at 5.5%, with Akademibokhandeln standing out with 8.3% in Q2. We have increased our estimates for all forecast years and raised our fair value range to SEK60–80 (SEK50–70).

Improvement on all fronts. Bokusgruppen reported sales of SEK408m, implying Y/Y growth of 16%, of which 5.5% was organic, and better than our SEK379m forecast. The gross margin improved by 4%-ppts Y/Y with good drop-through, EBIT of SEK-21m was ahead of our SEK-34m estimate (SEK-34m in Q2 2024). On a 12-month rolling basis EBIT posted 14% Q/Q growth after two years of modest growth on this metric. Operating cash flow improved Y/Y to SEK25m (8m). Working capital was negative in the guarter, which is within normal fluctuations, in our view.

We increase estimates due to higher growth and margin expectations. We lift our estimates for all forecast years due to both higher sales and margin assumptions.

The report is a sign of strength. In a challenging consumer environment, in our view, Bokusgruppen has managed to drive organic growth and integrate recent acquisitions well.

Fair value range raised to SEK60–80 (50–70). We have increased our fair value range to SEK60–80 due to higher estimates. We use a blended DCF and multiples approach. The 12-month forward P/E has ranged between 11x and 18x, excluding the challenging 2021–22 with pandemic restrictions. We apply this range to our current 12-month forward EPS estimate of SEK4.6. Our DCF is based on a WACC of 10%. The low end of our fair value range assumes an unchanged EBITDA margin in 2028e from 2027e and constant top-line growth of 2%; for the high end, Bokusgruppen meets its targeted sales growth of 4% and an EBITA margin of 8% in 2028e, which we have converted to an EBITDA margin of 14.9%, with 2% growth to perpetuity.

Equity story

Near term: within 12M

Bokusgruppen has invested in logistics and IT in the past two years, which we expect to improve sales growth with more targeted marketing efforts and lower logistics costs. The company announced three acquisitions in 2024, which should add to top-line growth and gross margin expansion in 2025. Given Bokusgruppen's 100% exposure to Swedish consumer demand, we expect improved private consumption due to lower interest rates, higher real wages and fiscal stimulus to have a positive impact on demand for physical books and streaming. The company's balance sheet is strong with solid cash flows, which ensures good dividend capacity, in line with the historical track record.

Long-term outlook: 5Y+

Bokusgruppen is present in all relevant channels, physical stores, online delivery and streaming services for literature. We therefore believe it can adapt to changing consumer behaviour, e.g. from physical shopping to online or vice versa. Demand growth is stable and has grown by 2% Y/Y over long periods, according to industry sources, with limited volatility, something we expect to continue. With a solid balance sheet, the room for bolt-on acquisitions is substantial. We expect cash flows to remain strong, giving room for good dividend capacity. The new EBITA margin target of 8% is challenging, in our view, and is not in our forecasts. If the target is met, we see scope for a significant re-rating.

Key risks:

- High inflation driving up store rents without the ability to raise prices.
- Consumption of literature below our forecasts and the company's historical track record.
- New entrants making inroads into the consolidated Swedish market, which increases price competition.

Company description

Bokusgruppen is Sweden's market-leading book retailer which, with strong and complementary brands, reaches a large share of Sweden's population. In addition to books in all channels and formats, it offers a large range of other products such as games and puzzles. Based on its "Joy of reading for everyone, every day" vision, Bokusgruppen aims to satisfy customers' varying requirements and be the preferred choice for as many as possible. It has more than 400 employees in offices and stores, is headquartered in Stockholm and has been listed on Nasdaq First North Premier Growth Market since 2021.

Key industry drivers

- Transition from physical stores to online in general over
- · Multi-channel strategies more fruitful than pure online
- Consolidation of small physical store-owners ongoing

Valuation and methodology

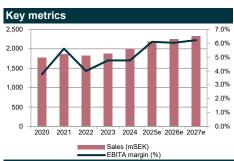

We use a blended DCF- and multiples-based approach for our fair value range calculation. Bokusgruppen's 12-month forward P/E has ranged between 11x and 18x, excluding the challenging 2021–22 due to the pandemic restrictions. We apply this range to our current 12-month forward EPS estimates. Our DCF is based on a WACC of 10%. The low end of our fair value range assumes an unchanged EBITDA margin in 2028e from 2027e and constant top-line growth of 2%; for the high end, Bokusgruppen meets its sales growth target of 4% and an EBITA margin of 8% in 2028e, with 2% growth to perpetuity.

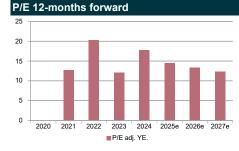

Fair value range 12M

To reach the low end of our fair value range, Bokusgruppen meets our EPS forecasts, is valued at the low end of its historical 12-month forward P/E range, and achieves 2% top-line growth and an EBITDA margin of 14.5% from 2028e

For the high end, Bokusgruppen meets our EPS estimates, is valued at the high end of its historical 12-month forward P/E range, and achieves 4% top-line growth and an EBITDA margin of 14.9% from 2028e, with 2% growth to perpetuity.

The report in brief

Bokusgruppen reported sales of SEK408m, implying Y/Y growth 16.4%, of which 5.5% was organic. We had estimated SEK379m for the quarter and Y/Y organic growth of 1%. Sales growth was widespread, e.g. Akademibokhandeln grew by 14.2% Y/Y and store sales were 14.5%, of which 8.1% was organic. This outperformed Swedish macroeconomic retail sales data in April and May, in our view. Bokus reported Y/Y growth of 20.7%, where the lion's share came from the acquisition of BTJ. Growth from the consumer side was 5.3% Y/Y in Q2 for Bokus and student books developed well, according to the report.

Operating cash flow improved Y/Y to SEK25m (8m). Working capital was negative in the quarter, which is within normal fluctuations, in our view.

Estimate revisions

We lift our estimates for all forecast years due to both higher sales and margin assumptions. The deviation is more significant in this year; we had previously expected the soft consumer environment to have a bigger negative impact on profitability in 2025.

Risks

Exposure to the Swedish consumer cycle

Given its 100% exposure to Sweden and consumer products, Bokusgruppen is dependent on the Swedish consumer cycle. However, Bokusgruppen sells small ticket items used in everyday life, and the risk is lower than for many other retailers, in our view.

Physical stores exposed to rent hikes

Most rent contracts' yearly increases are pegged to the consumer price index, and in times of high inflation, Bokusgruppen is exposed to high cost inflation from rents that can be difficult to pass on to customers.

All literature consumption becomes subscriptions

In the unlikely event of a total drop in the use of physical books, other names such as Storytel or giant tech companies such as Apple could increase competition in the subscription field, while Bokusgruppen's physical store network becomes unprofitable.

We stop reading

In the likewise unlikely event that the Swedish-speaking population stops consuming literature completely, turning to e.g. movies or sports, Bokusgruppen would for obvious reasons no longer be relevant.

Increasing competition from new market entrants

The literature market is characterised by strong positions and low growth rates, limiting the attractiveness for new competitors. Should new competition appear, Bokusgruppen could face challenging price erosion. In our view, with no other realistic alternatives, new entrants would need to compete on price.

The Report does not constitute investment advice

This research report is made for information purposes only, and does not constitute and should not in any way be considered as an offer to buy or sell any securities or other financial instruments or to participate in any investment strategy. This research report has been prepared as general information and is therefore not intended as a personal recommendation of particular financial instruments or strategies, and does not constitute personal investment advice. Investors should therefore make their own assessments of whether any of the trading ideas described herein are a suitable investment based on the investor's knowledge and experience, financial situation, and investment objectives.

Risk warning

The risk of investing in financial instruments is generally high. Past performance is not a reliable indicator of future performance, and estimates of future performance are based on assumptions that may not be realised. When investing in financial instruments, the value of the investment may increase or decrease, and the investor may lose all or part of their investment. Careful consideration of possible financial distress should be made before investing in any financial instrument.

Analyst certification

The research analyst(s) responsible for the content of this research report certify that: 1) the views expressed in this research report accurately reflect that research analyst's personal views about the company and the securities that are the subject of this research report; and 2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this research report. DNB Carnegie employees, including research analysts, may receive compensation that is generated by overall firm profitability.

Type of coverage, including valuation methodologies and assumptions

1. Fundamental analysis with a target price and recommendation. DNB Carnegie publishes a target price for most of the stocks in our Research Universe. The target price is the analyst's assessment of expected total return (including dividend per share) over the coming 12 months based on various fundamental valuation methods. The target price is based on a combination of several valuation methods such as discounted cash flow, pricing based on earnings multiples, multiple on book value, net asset value and peer comparison. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers to obtain a target price. For companies where it is appropriate, a target price can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Target prices are revised when earnings and cash flow forecasts are changed. Thus, changes to estimates are a key risk to the target price. Other reasons for revising target prices include changes in the underlying value of a company's assets and when factors affecting the required rate of return change, which can also be seen as risk factors to the target price.

2. Quantitative and technical analysis. DNB Carnegie produces research based on quantitative and technical analysis ("quant products"). Such research is based on mathematical and technical models applied to companies, industries and sectors, rather than a fundamental analysis of a company. Quantitative and technical analysis thus does not result in estimates, a valuation or a recommendation (e.g. BUY, SELL, HOLD). Quant products may also have a significantly different time horizon from those of other products generated by DNB Carnegie. The views expressed in quant products may thus differ from, or conflict with, those presented in other research reports generated by DNB Carnegie.

3. Commissioned research reports include the analyst's assessment of a fair value range over the coming 6-12 months based on various fundamental valuation methods. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers. For companies where it is appropriate, a fair value range can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Fair value ranges represent the assessment of the analyst(s) at the time of writing.

You will find detailed information about the valuation or methodology, the underlying assumptions, and risks on DNB Carnegie Edge (www.edge.carnegie.se). The complete history of equity research reports and previous recommendations can also be found on DNB Carnegie Edge and here.

Frequency of update

DNB Carnegie's research analysis consists of case-based analyses, meaning the frequency of the analytical research report may vary over time. Unless otherwise expressly stated in this research report, the analysis is updated when considered necessary by the research department, for example in the event of significant changes in market conditions or events related to the issuer/the financial instrument.

Potential conflicts of interest

DNB Carnegie may from time to time perform investment banking or other services for, or solicit investment banking or other business from, any company mentioned in this research report. Any such publicly announced business activity during the past 12 months will be referred to in the company-specific disclosures.

Readers should assume that any company mentioned in this research report may have an active client relationship with DNB Carnegie which is not disclosed due to client confidentiality e.g. trading in securities

DNB Bank ASA, its affiliates and subsidiaries are engaged in commercial banking activities, and may for example be a lender to any company mentioned in this research report. This means that certain parts of these entities might have access to whatever rights and information regarding addressed companies as are available to a creditor under applicable law and the applicable loan and credit agreements.

DNB Carnegie and the rest of DNB Group have implemented a set of rules handling conflicts of interest. This includes confidentiality rules restricting the exchange of information between various parts of DNB Carnegie and the rest of DNB group. In order to restrict flows of sensitive information, appropriate information barriers have been established between the Investment Banking Division and other business departments in DNB Carnegie, and between DNB Carnegie and other business areas in the DNB Group. People outside an information barrier may gain access to sensitive information only after having observed applicable wall-crossing procedures. This means that employees of DNB Carnegie who are preparing the Reports are prevented from using or being aware of information available in other parts of DNB Carnegie or DNB Group that may be relevant to the recipients' decisions.

The remuneration of employees involved in preparing this research report is not tied to investment banking transactions performed by DNB Carnegie or a legal person within the same group.

Confidential and non-public information regarding DNB Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner. Internal guidelines are implemented to ensure the integrity and independence of research analysts. In accordance with the guidelines, the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues: contacts with covered companies, prohibition against offering favourable recommendations, personal involvement in covered companies, participation in investment banking activities, supervision and review of research reports, analyst reporting lines, and analyst remuneration.

DNB Carnegie and any of its officers or directors may have a position, or otherwise be interested in, transactions in securities that are directly or indirectly the subject of this research report. Any significant financial interests held by the analyst, DNB Carnegie, or a legal person in the same group in relation to the issuer will be referred to in the company-specific disclosures.

Other material conflicts of interest: Commissioned Research

This research report was commissioned and sponsored by the issuer (issuer-paid research) and should therefore be considered marketing communication (i.e. not investment research).

Payment for this research report has been agreed in advance on a non-recourse basis. As commissioned research, this research report can be considered an acceptable minor non-monetary benefit under MiFID II. It has not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, it is still subject to the same confidentiality rules and sound research principles.

Commissioned research is intended only for professional investors. Such investors are expected to make their own investment decisions without undue reliance on this research report.
