CEO leaving creates uncertainty – Q3 preview

Successful CEO Andreas Elgaard announcing his departure, in the midst of the HMY integration, obviously creates uncertainty, but against 'easier' Y/Y comparables, we expect Q3 to show strong profitable growth. We have only tweaked our forecasts, and adjusted our fair value to SEK25–32 (26–33), still seeing a solid industrial roll-up story.

Q3 preview. We see 'easier' Y/Y comparables for ITAB in Q3 than it faced in H1, and we expect solid progress even though it still described the underlying market as "cautious, but stable". We expect revenue up 113% Y/Y, with an adj. EBIT margin of 5.9% (+7bps), for adjusted EBIT of SEK194m (up 116% Y/Y), still 16% below the pro forma Q3 2024 level including HMY.

HMY integration progressing well. ITAB's management indicated that the HMY integration is progressing well with the hiccups in Q2 having been addressed. Given it is still early days of the HMY integration, and the weak Q2 results, the announcement that CEO Andreas Elgaard is leaving to take up the helm at Arjo is concerning to us, but seems to have been a personal decision to pursue other opportunities. While there is never a good time to phase out a successful CEO, we find his successor will start off with a solid industrial roll-up position established, with the potential for further efficiency gains.

Minor forecast changes. We have only tweaked our forecasts ahead of the Q3 results. We find ITAB's financials already looking more solid on a pro forma basis, with net debt/adj. EBITDA of 2.65x at end-Q3 2025e, with improving cash conversion likely to translate into its 'financial muscle quickly being rebuilt, and the ITAB/HMY platform geared for more potential acquisitions from a 2027 perspective.

Fair value adjusted to SEK25–32 (26–33), on peer valuation moves, with the range reflecting the potential to create a European market leader in the retail fittings segment. A valuation on a par with ITAB's historical LTM valuation would indicate SEK28–30, our relative peer group valuation SEK24–30 and our DCF SEK32–40.

Equity story

Near term: within 12M Quarterly volatility remains high in the early integration phase of the transformative HMY acquisition, but the potential to create a European market leader in the retail fittings segment makes for an attractive equity story in our view.

Long term outlook: 5Y+

With the acquisition of HMY, ITAB has become the European market leader with global reach in the segment of retail store fittings, with a strong offering also in retail technology systems and lighting products, delivering on an impressive sector roll-up strategy. The sector is still highly fragmented, so assuming ITAB/HMY is fully integrated with strong financials re-established, the new foundation should be well placed to continue to drive sector consolidation and shareholder-friendly capital allocations.

Key risks:

- Market demand not recovering as expected.
- Weak consumer confidence affecting market demand more than expected and ITAB not able to offset it.
- ITAB failing to successfully integrate HMY, with the combined operation not able to realise its potential.
- Fragmented market with many local/regional competitors with large customers making for a tough competitive market environment with a high price focus in the traditional segments of retail store fittings.

Company description

ITAB/HMY is the leading European supplier of retail solutions including consultative design services, custom-made interiors, checkout systems, consumer guidance solutions, professional lighting systems and interactive digital solutions for the physical store.

Key industry drivers

- Retailer demand to create a more efficient and revenuegenerating operation.
- Retailer demand to establish new stores and refurbishing existing sites to expand their operations.

Industry outlook

- Generally wide variability among retail customers depending on financial strength and growth opportunities in their sub-sectors.
- Still-solid demand for high-ROI offerings.

Largest shareholders, capital

| Pomona-gruppen | 15.7% |
|-------------------------|-------|
| Acapital ITAB HoldCo AB | 15.1% |
| Petter Fägersten | 10.3% |

Cyclicality

Cyclicality: Yes

y Key peers

Mid

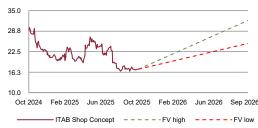

SME industrial peers: Alligo AB, Alimak AB, Bergman & Beving AB, Coor Service Management, Nederman AB, Fagerhult AB.

Nordic retail peers: H&M AB, Axfood AB, Clas Ohlson AB, Europris AS, Tokmanni Oy, Byggmax AB.

Valuation and methodology

The low end of our fair value range is based on ITAB's historical LTM average multiples applied to our 2025–27e and the low end of the peer group relative valuation. The high end of our fair value range is based on the lower end of our DCF and the high end of the peer group relative valuation range.

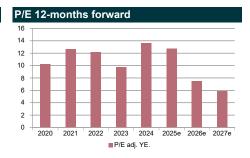

Fair value range 12M

High end of fair value range: Moving from a product focus to solutions and systems orientation offers potential to become a preferred supplier to more of Europe's retail sector. Promising growth platform in Retail Technology. Our high-end fair value is based on the low end of our DCF valuation supported by the high-end relative peer group valuation and ITAB's own historical LTM valuation.

Low end of fair value range: Competitive and fragmented market, with key customers generally being large, with a keen cost focus, putting pressure on the supplier base. Our low-end fair value is based on the low end of the relative peer group valuation supported by the low end of ITAB's historical LTM valuation.

Source: DNB Carnegie (estimates), company (historical data), Bloomberg (consensus)

As ITAB's H1 proved, it is always difficult to compare against pro forma adjusted numbers, particularly as the old ITAB operations had a very strong first half of 2024, with a number of large higher-margin technology solutions projects delivered, and with HMY also benefiting from a strong first half in its main French operations. However, the company has commented that the actions implemented in France and some other smaller markets are already offsetting some of the challenges, with the overall market seen as still stable but muted. Similarly, looking at the pro forma 2024 base, Y/Y comparables in H2 look much 'easier' on both the ITAB and the HMY side. ITAB's has management also commented that the integration work with HMY is moving ahead according to plan, suggesting that we should start to see some of the highlighted synergy potential drive performance, even though we still see this more as an opportunity for 2026 in our forecasts.

Source: DNB Carnegie (estimates) & company

For Q3, we forecast revenue growth of 113% Y/Y on a reported basis (-7% versus pro forma Q3 2024) to SEK3,309m. We expect a slightly better mix Y/Y, suggesting Q/Q gross margin expansion on a pro forma basis, but still weaker Y/Y on a reported basis, implying gross margin contraction of 360bps to 24.5%, mainly related to the HMY acquisition (+107bps Y/Y on a pro forma basis). Similarly, we forecast a largely stable EBIT margin of 5.9% (+7bps Y/Y), for adjusted EBIT of SEK194m, up 116% Y/Y on a reported basis but down 16% Y/Y on a pro forma basis, mainly related to lower profit margins in HMY.

We have made only marginal forecast changes ahead of the Q3 report, mainly related to FX and non-cash items (minor changes to depreciation/amortisation), resulting in 1–0% cuts to our EPS forecasts for 2025–27. From a financing perspective, we estimate ITAB's net debt to EBITDA strengthening to 3.20x by end-Q3 (3.09x IFRS16 adj.); it is still only set to include HMY-related EBITDA from February (i.e. eight months), but with the full financial burden. However, on a pro forma basis including HMY, adj. EBITDA for the full LTM period would suggest a healthier financial position even now, with a net debt/adj. EBITDA of c2.74x (c2.65x excluding an IFRS16 effect) by end-Q3e.

Compared to ITAB's financial targets, our updated forecasts suggest substantially higher revenue growth over 2025–27 (4–8% targeted), particularly in 2025. While we expect the 2025 EBIT margin to fall shy of the 7–9% target, we expect 2026–27 to be supported by synergy realisation and an improving underlying market, with the EBIT margin progressing towards the middle of the range. We forecast cash conversion to be slightly weaker than targeted during the period, but still expect healthy FCF generation. We see headroom for ITAB to restart its dividend distribution already in relation to 2025.

Valuation and risks

As illustrated in the chart below, ITAB Shop Concept's share price has seen some volatility, hitting a pandemic-related low in early-2020 on a par with the adjusted share price around the IPO in 2004. The share price has recovered strongly since, despite being negatively affected by the early tough comparisons for the new ITAB/HMY operations as well as the announcement of CEO Andreas Elgaard resigning for another assignment. Given the HMY acquisition and earlier successful implementation of the 'One ITAB' strategy, we find ITAB has advanced its positions, with a much stronger roadmap for the future, complemented by strengthening financials. Given that the stock has limited analyst coverage and limited, but growing, local and international institutional ownership, we believe the ITAB industrial roll-up story and 'One ITAB' strategy implementation have gone relatively unnoticed by the broader investment community.

Given the limited consensus with which to compare our forecasts and a wide universe of sector peers, we find the toolbox of normal valuation measures, such as relative valuation versus the company's own historical forward-looking valuation ratios and peer comparison, less straightforward.

ITAB - P/E LTM (x)

30.0

Source: DNB Carnegie (estimates), company (historical data) & Bloomberg (price data)

Historical valuation (LTM base)

To bridge the gap of not having historical forward-looking valuation ratios (NTM), we have created the long-term quarterly charts above on an LTM basis, which should be a fair approximation given ITAB's long history as a listed company, despite losing some of the investor sentiment at the time based on actual outcomes rather than the outlook. The historical charts show 2014–16 as having exceptionally high expectations, driven by the company becoming a European market leader in the retail store fittings industry through some well-executed acquisitions at attractive valuations combined with investors attracted to the growing technology angle to ITAB, with its launch of the self-checkout range at the time. Including this high-expectation period, we assess ITAB's average LTM valuation at a P/E of 16.0x, EV/sales of 0.97x, EV/EBITDA of 10.1x and EV/EBIT of 14.7x for 2011–25e. This would imply that ITAB is currently valued 54% below (range 49–59%) its long-term valuation ratios, looking at the current valuation on our 2026e.

However, we believe it will take some time for ITAB to full re-establish its growth trajectory, with an institutional owner base giving full benefit to the HMY acquisition, which would be required to make the long-term average valuation a logical target. If we instead shorten the valuation base to 2021–25e, we calculate ITAB's average LTM valuation at a P/E of 11.5x, EV/sales of 0.71x, EV/EBITDA of 6.6x and EV/EBIT of 10.5x, which would still imply that ITAB is currently valued 34% below (range 31–43%) our 2026 expectations. In our view, this seems to be a more realistic valuation base, at least in the medium term, still suggesting a valuation range of SEK28.00–32.00 per ITAB share at present on its own historical valuation multiples.

Peer group relative valuation

We struggle to identify any direct peers to ITAB for a valuation and performance comparison, and our suggested peer groups thus first include Nordic SME Industrial companies (the subgroup ITAB itself features in from an index view), and second, Nordic Retail companies. Neither is perfect on a more detailed level, but should give a good view of the local preferences on a more aggregated level.

In the table below, +1Y relates largely to calendar year 2025 for most companies in our peer groups, while +2Y relates to 2026 and +3Y to 2027. Taking an average of the valuation multiples for the Nordic SME Industrial peer group for 2025–27e suggests that, on our forecasts, ITAB is valued at an average of 48% below, and at an average of 40% below the Nordic Retail peer group.

The lower valuation of the Nordic Retail peer group also gives an indication for ITAB given that it is a part of its customer base, suggesting a lower valuation than the Nordic SME Industrial peer group. This indicates ITAB Shop Concept sells at lower multiples than its peers and a valuation on a par with the average of the Nordic SME Industrial peer group would calculate to SEK34.10 per ITAB share (range SEK30.10–37.40 across valuation ratios), and SEK29.80 per share (range SEK23.90–36.70) applying multiples for the Nordic Retail peer group. We use the low points of the respective peer groups as our range (SEK23.90–30.10) for peer group valuation comparison.

Source: DNB Carnegie (estimates red]) & Bloomberg (consensus and share prices) Note: Share prices correct as of market close on 11 November 2025

ITAB's historical FCF generation has been volatile, mainly related to the large working capital swings. Looking at FCF to sales between 2011 and 2024, the average FCF margin was 3.6%, with an annual variation range from -5.9% to +12.1% when we include working capital changes in FCF. However, if for the same period we look at FCF excluding working capital changes, the average was 3.8%, i.e. marginally higher, but more interestingly the annual range narrows to -1.5% to +6.9%, indicating solid FCF generation relative to sales, with working capital movements largely balancing themselves out over time.

Given its cash flow generation profile, ITAB's prospects look attractive to us, even in a conservative DCF calculation. Our DCF base case assumes:

A 2024-27e revenue CAGR of 31.6%, and a 2028-31e CAGR of 3.4%, falling to 2.2% over 2032-36e, and 1.0% growth in the terminal period.

- Average EBITDA margins of 10.9% for 2024–27e, 11.4% for 2028–36e and 10.6% in the terminal period, in line with the mid-range of the company's target for an EBIT margin of 7–9% during our forecast period.
- Depreciation and amortisation of 3.8% for 2024–27e, in line with its historical average of 3.8% in 2018–24, declining to an average 3.6% of sales over 2028–2036e in the terminal period, with normalised capex-to-sales in line with depreciation and amortisation for 2028–36e, and the terminal period adjusted for the impact of financial leases. Our finance costs assume a normalisation to the low gearing, and we assume a normalised tax rate of 27.0–28.0%, and net working capital-to-sales of ~15%.
- A WACC of 8.8%, assuming an 11.1% cost of equity, a 5.4% cost of debt, and an adjusted beta of 1.10.

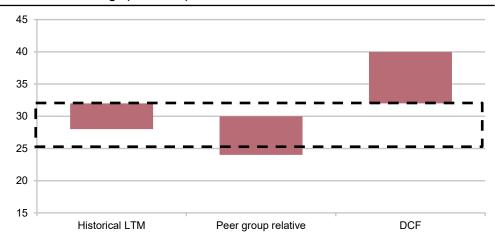

These assumptions yield a fair DCF value range of SEK32.10–40.50/share based on WACCs of 8.2–9.5%, with a mid-point of SEK36.00/share based on a WACC of 8.8%.

Our fair value range adjusted to SEK25-32 (26-33)

We have adjusted our fair value range down slightly to SEK25–32 (26–33), mainly related to peer group relative valuation changes, in our view reflecting the HMY acquisition and potential for the coming years, including front-end loaded risks as is usual for larger mergers in creating a European market leader in the retail fittings segment.

In our view, our updated DCF of SEK32–40 more fully reflects the potential in a successful completion and full realisation of the indicated cost and revenue synergies, with the lower end of the DCF range supporting our high end of the fair value range, with ITAB's historical LTM valuation multiples (SEK28–32) and peer group relative valuation (SEK24–30) within our fair value range. Note our valuation methodology does not include uncompleted value-creating acquisitions or undisclosed capital allocation.

ITAB fair value range (SEK25-32)

Risks

Any investment in securities involves risks linked to economic activity, financial market performances, taxation, and political involvement, as well as accounting and regulatory changes. In addition, we see risks related to ITAB's operations, including risks related to changes in the retail market, geopolitical circumstances and macroeconomic factors.

Economic downturn. A weakening of the European (or global) economy or a rise in geopolitical tensions could hurt the market environment, change the competitive landscape and make retail clients less willing to invest in upgrading existing or to open new stores.

Market risk. ITAB provides products and solutions in numerous markets. Demand correlates with the general economic environment of each country. Uncertainty remains around what the market effect will be related to high cost inflation and weak consumer confidence in general, with the effect potentially being the risk of a weaker retail market and ITAB's customers less willing to invest.

Currency risk. ITAB is exposed to FX risk, mainly from a translation perspective.

New customer demands. It is crucial for ITAB to be able to predict and adapt to the changing preferences and behaviour of consumers, and in turn customers, in a timely manner, to be able to retain its current customers and attract new ones.

New types of solutions required by the clients. ITAB's production facilities have had to be transformed from mainly working with fewer large volume orders for the roll-out of completely new stores to having more flexible production with more, but smaller, orders for more project-based store remodelling.

Supply-chain risk. ITAB's production is dependent on raw materials and components, which exposes ITAB to risks related to price variations and supply disruptions for such raw materials and components that are needed for ITAB's operations, which may affect ITAB's production costs

IT security. ITAB is exposed to risks related to IT systems and cybersecurity. ITAB's business and operations are particularly dependent on the reliability, function and continued development of its IT systems regarding data communication and enterprise systems that the group uses for workflow, from order to delivery.

Customer risk. Historically, ITAB has had low credit losses. Any increase could harm the company's financial position and results. The customer concentration is relatively low, with its largest customer in 2024 representing about 10% of group net sales.

Competitive landscape. ITAB's markets are competitive and fragmented in such a way that it competes directly with other companies that offer shop solutions and concepts as well as with companies that provide products and services it also provides and develops, e.g. entrance and exit systems, checkouts and lighting, and digital solutions for physical stores, such as digital queuing systems in physical stores.

Acquisitions. Acquisitions expose ITAB to several risks and uncertainties including that expected advantages of an acquisition turn out to be more difficult and costlier to realise, with the HMY acquisition in 2025 being the largest completed by ITAB with full realisation of suggested deal synergies not seen until 2027e.

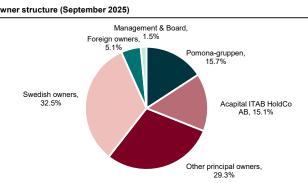

Sustainability. ITAB's customers are increasingly demanding sustainable manufacturing processes, good working conditions and sustainable choices of materials and raw materials.

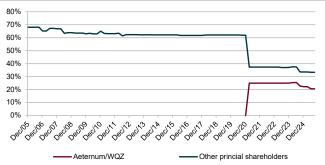

Own reputation. ITAB is dependent on its good reputation to access its customer base.

Legal risks. The group has implemented a code of conduct that regulates zero-tolerance of all forms of bribery and corruption.

Note: EPS based on average quarterly fully diluted number of shares whereas our autogenerated tables use an annual average resulting in a minor calculation difference in 2024 and 2025.

DNB Carnegie's Sustainability Scorecard

DNB Carnegie total ESG peer rating: 51%

Taxonomy eliqible: Yes

Sustainability as a business driver

With increasing customer focus on sustainability and innovation, collaboration for a sustainable future has become a key differentiator for ITAB and is an integrated part of its One ITAB strategy; however, targets and outcomes still have to be updated for the HMY acquisition, with comments below thus related to 'old' ITAB.

ITAB has turned sustainability into a business proposition towards its clients, such as offering carbon assessment and its Retail Lighting operation offering advanced energy-saving solutions based on the latest LED technology.

From an internal perspective, focus has been on sustainable product development and efficiency in the value chain as well as safeguarding good working conditions and business

Sustainability targets and achievements

In 2022, ITAB established a baseline for good working conditions with KPIs such as Total Frequency Rate (TFR) for accidents and a Lost Time Severity Rate (LTSR) reporting a 2024 TFR of 11.60 (8.23) and LTSR of 0.25 (0.28). With a target of zero accidents, this still leaves some work to do.

With benchmarks established in 2022 for Scope 1 and 2 greenhouse gas emissions, ITAB is working actively towards its own target to achieve a 50% absolute reduction by 2030, seeing a 10% Scope 1 and 25% Scope 2 reduction in 2024.

Like many other companies, ITAB does not score well in the EU Taxonomy scoring. Only its lighting (7.1% of net sales) and technology (circular economy; 28.4% of net sales) manufacturing are eligible as 'climate change mitigators'. However, the group alignment to Taxonomy is only 0.3% of net sales.

Sustainability related risks and past incidents

We assess ITAB's ESG-related risks to be well-addressed by the company and primarily related to working conditions, efficiency, business ethics and development of new solutions.

In a wider context, unsuccessful acquisitions and quality failures could result in reputational damage and loss of business, and with a demanding client base the risk of not keeping up with the growing consumer ESG demands a constant challenge.

Disclosures and disclaimers

DNB Carnegie

DNB Carnegie is a Business Area in the DNB Group comprising: 1) the investment services division of DNB Bank ASA; 2) DNB Carnegie Investment Bank AB (a wholly owned subsidiary of DNB Bank ASA) and 3) DNB Carnegie, Inc. (a wholly owned subsidiary of DNB Bank ASA). DNB Carnegie is a leading Nordic provider of investment services.

DNB Carnegie generates added value for institutions, companies and private clients in the areas of trading in securities, investment banking, and securities services.

The research of DNB Carnegie is produced in the investment services division of DNB Bank ASA and DNB Carnegie Investment Bank AB; thus "DNB Carnegie" should be read as meaning these two entities throughout the disclaimer text, unless otherwise expressively stated.

General

This research report has been prepared by DNB Carnegie and is based on information obtained from various public sources that DNB Carnegie believes to be reliable but has not independently verified, and DNB Carnegie makes no guarantee, representation or warranty as to its accuracy or completeness.

This research report does not, and does not attempt to, contain everything material that there is to be said about the company. Any opinions expressed herein reflect DNB Carnegie's judgement at the time this research report was prepared and are subject to change without notice.

DNB Bank ASA, its affiliates and subsidiaries, their directors, officers, shareholders, employees or agents, are not responsible for any errors or omissions, regardless of the cause, or for the results obtained from the use of this research report, and shall in no event be liable to any party for any direct, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs) in connection with any use of this research report.

Any use of non-DNB Carnegie logos in this research report is solely for the purpose of assisting in identifying the relevant party. DNB Carnegie is not affiliated with any such party.

DNB Carnegie produces and distributes research reports from 1) the investment services division of DNB Bank ASA; and 2) DNB Carnegie Investment Bank AB (a wholly owned subsidiary of DNB Bank ASA). Clients receiving research reports from DNB Carnegie will therefore receive research reports produced by both companies. This research report is produced in the DNB Carnegie company where the responsible analyst is employed, please see the responsible analyst's name and DNB Carnegie company on the front page under the analyst's name to determine in which DNB Carnegie company this research report is produced.

This research report is distributed in Norway, the US, Singapore, Canada and Australia by the investment services division of DNB Bank ASA; in Sweden, Finland and Denmark by DNB Carnegie Investment Bank AB (a wholly owned subsidiary of DNB Bank ASA); and in the UK by the investment services division of DNB Bank ASA and DNB Carnegie Investment Bank AB, respectively.

DNB Carnegie is under supervision

DNB Bank ASA is a bank incorporated in Norway and is authorised and regulated by the Norwegian Financial Supervisory Authority. DNB Bank ASA is established in Singapore and in the UK via its Singapore and UK branches, which are authorised and regulated by the Monetary Authority of Singapore, and on a limited basis by the Financial Conduct Authority and the Prudential Regulation Authority of the UK respectively. DNB Bank ASA is established in Sweden via its Sweden branch which are subject to supervision by the Financial Supervisory Authority of Sweden. DNB Carnegie Investment Bank AB is a bank incorporated in Sweden with limited liability and is authorised and regulated by the Swedish Financial Supervisory Authority. DNB Carnegie Investment Bank AB is established in the UK kia its UK branch which is authorised and regulated by the UK Financial Conduct Authority (FCA). DNB Carnegie Investment Bank AB is established in Finland and Denmark via its Finland and Denmark branches which are subject to limited supervision by the respective national Supervisory Authorities.

Further details about the extent of regulation by local authorities outside Norway and Sweden are available on request.

Property rights

This research report is for clients only, and not for publication, and has been prepared for information purposes by DNB Carnegie.

This research report is the property of DNB Carnegie. DNB Carnegie retains all intellectual property rights (including, but not limited to, copyright) relating to this research report. Sell-side investment firms are not allowed any commercial use (including, but not limited to, reproduction and redistribution) of this research report contents, either partially or in full, without DNB Carnegie's explicit and prior written consent. However, buy-side investment firms may use this research report when making investment decisions, and may also base investment advice given to clients on this research report. Such use is dependent on the buy-side investment firm citing DNB Carnegie as the source.

The Report does not constitute investment advice

This research report is made for information purposes only, and does not constitute and should not in any way be considered as an offer to buy or sell any securities or other financial instruments or to participate in any investment strategy. This research report has been prepared as general information and is therefore not intended as a personal recommendation of particular financial instruments or strategies, and does not constitute personal investment advice. Investors should therefore make their own assessments of whether any of the trading ideas described herein are a suitable investment based on the investor's knowledge and experience, financial situation, and investment objectives.

Risk warning

The risk of investing in financial instruments is generally high. Past performance is not a reliable indicator of future performance, and estimates of future performance are based on assumptions that may not be realised. When investing in financial instruments, the value of the investment may increase or decrease, and the investor may lose all or part of their investment. Careful consideration of possible financial distress should be made before investing in any financial instrument.

Analyst certification

The research analyst(s) responsible for the content of this research report certify that: 1) the views expressed in this research report accurately reflect that research analyst's personal views about the company and the securities that are the subject of this research report; and 2) no part of the research analyst's compensation was, is, or will be, directly or indirectly, related to the specific recommendations or views expressed by that research analyst in this research report. DNB Carnegie employees, including research analysts, may receive compensation that is generated by overall firm profitability.

Type of coverage, including valuation methodologies and assumptions

1. Fundamental analysis with a target price and recommendation. DNB Carnegie publishes a target price for most of the stocks in our Research Universe. The target price is the analyst's assessment of expected total return (including dividend per share) over the coming 12 months based on various fundamental valuation methods. The target price is based on a combination of several valuation methods such as discounted cash flow, pricing based on earnings multiples, multiple on book value, net asset value and peer comparison. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers to obtain a target price. For companies where it is appropriate, a target price can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Target prices are revised when earnings and cash flow forecasts are changed. Thus, changes to estimates are a key risk to the target price. Other reasons for revising target prices include changes in the underlying value of a company's assets and when factors affecting the required rate of return change, which can also be seen as risk factors to the target price.

2. Quantitative and technical analysis. DNB Carnegie produces research based on quantitative and technical analysis ("quant products"). Such research is based on mathematical and technical models applied to companies, industries and sectors, rather than a fundamental analysis of a company. Quantitative and technical analysis thus does not result in estimates, a valuation or a recommendation (e.g. BUY, SELL, HOLD). Quant products may also have a significantly different time horizon from those of other products generated by DNB Carnegie. The views expressed in quant products may thus differ from, or conflict with, those presented in other research reports generated by DNB Carnegie.

3. Commissioned research reports include the analyst's assessment of a fair value range over the coming 6-12 months based on various fundamental valuation methods. A commonly used method is DCF valuation, where future cash flows are discounted to today. Analysts may also use different valuation multiples, e.g. P/E and EV/EBIT, relative to industry peers. For companies where it is appropriate, a fair value range can also be based on the analyst's assessment of a fair ratio relative to the net asset value of the company. Fair value ranges represent the assessment of the analyst(s) at the time of writing.

You will find detailed information about the valuation or methodology, the underlying assumptions, and risks on DNB Carnegie Edge (www.edge.carnegie.se). The complete history of equity research reports and previous recommendations can also be found on DNB Carnegie Edge and here.

Frequency of update

DNB Carnegie's research analysis consists of case-based analyses, meaning the frequency of the analytical research report may vary over time. Unless otherwise expressly stated in this research report, the analysis is updated when considered necessary by the research department, for example in the event of significant changes in market conditions or events related to the issuer/the financial instrument.

Potential conflicts of interest

DNB Carnegie may from time to time perform or solicit investment banking services for any company mentioned in this research report. Any such publicly announced business activity during the past 12 months will be referred to in the company-specific disclosures.

Readers should assume that any company mentioned in this research report may have an active client relationship with DNB Carnegie which is not disclosed due to client confidentiality e.g. trading in securities. Readers should also assume that DNB Carnegie may provide registrar services to the company, and/or assist with new issuance of bonds where the process is handled by Fixed Income Sales only

DNB Bank ASA, its affiliates and subsidiaries are engaged in commercial banking activities, and may for example be a lender to any company mentioned in this research report. This means that certain parts of these entities might have access to whatever rights and information regarding addressed companies as are available to a creditor under applicable law and the applicable loan and credit agreements.

DNB Carnegie and the rest of DNB Group have implemented a set of rules handling conflicts of interest. This includes confidentiality rules restricting the exchange of information between various parts of DNB Carnegie and the rest of DNB group. In order to restrict flows of sensitive information, appropriate information barriers have been established between the Investment Banking Division and other business departments in DNB Carnegie, and between DNB Carnegie and other business areas in the DNB Group. People outside an information barrier may gain access to sensitive information only after having observed applicable wall-crossing procedures. This means that employees of DNB Carnegie who are preparing the research reports are prevented from using or being aware of information available in other parts of DNB Carnegie or DNB Group that may be relevant to the recipients' decisions.

The remuneration of employees involved in preparing this research report is not tied to investment banking transactions performed by DNB Carnegie or a legal person within the same group.

Confidential and non-public information regarding DNB Carnegie and its clients, business activities and other circumstances that could affect the market value of a security ("sensitive information") is kept strictly confidential and may never be used in an undue manner. Internal guidelines are implemented to ensure the integrity and independence of research analysts. In accordance with the guidelines, the research department is separated from the Investment Banking department and there are no reporting lines between the research department and Investment Banking. The guidelines also include rules regarding, but not limited to, the following issues: contacts with covered companies, prohibition against offering favourable recommendations, personal involvement in covered companies, participation in investment banking activities, supervision and review of research reports, analyst reporting lines, and analyst remuneration.

DNB Carnegie and any of its officers or directors may have a position, or otherwise be interested in, transactions in securities that are directly or indirectly the subject of this research report. Any significant financial interests held by the analyst, DNB Carnegie, or a legal person in the same group in relation to the issuer will be referred to in the company-specific disclosures.

Other material conflicts of interest: Commissioned Research

This research report was commissioned and sponsored by the issuer (issuer-paid research) and should therefore be considered marketing communication (i.e. not investment research).

Payment for this research report has been agreed in advance on a non-recourse basis. As commissioned research, this research report can be considered an acceptable minor non-monetary benefit under MiFID II. It has not been prepared in accordance with the legal requirements designed to promote the independence of investment research. However, it is still subject to the same confidentiality rules and sound research principles.

Commissioned research is intended only for professional investors. Such investors are expected to make their own investment decisions without undue reliance on this research report.

Company specific disclosures

The following disclosures relate to relationships between DNB Carnegie Investment Bank AB (with its subsidiaries, "DNB Carnegie") and the subject company.

Within the past 12 months DNB Carnegie has provided and/or received compensation for investment banking services and/or ancillary services regarding the following issuer(s): ITAB Shop Concept

Please see edge.dnbcarnegie.se/legal/disclosuresanddisclaimers for equity disclosures and historical recommendation and target price information on all companies covered by DNB Carnegie.

Additional information for clients in Australia

This research report has been prepared and issued outside Australia.

DNB Bank ASA ARBN 675 447 702 is exempt from the requirement to hold an Australian financial services licence under the Corporations Act 2001 (Cth) ("Corporations Act") in respect of financial services it provides to "wholesale clients" within the meaning of the Corporations Act ("Wholesale Clients"). DNB Bank ASA accordingly does not hold an Australian financial services licence. DNB Bank ASA is regulated by Finanstilsynet (the Financial Supervisory Authority of Norway) under the laws of Norway, which differ from Australian laws.

This research report is provided only to authorised recipients who are both Wholesale Clients and "professional investors" within the meaning of the Corporations Act. In no circumstances may this research report be provided to any other person.

No member of the DNB Group, including DNB Bank ASA and DNB Carnegie Investment Bank AB, is an authorised deposit-taking institution ("ADI") under the Banking Act 1959 (Cth). Accordingly, neither DNB Bank ASA nor DNB Carnegie Investment Bank AB is supervised by the Australian Prudential Regulation Authority as an ADI.

DNB Bank ASA is a limited liability company incorporated in Norway.

Nothing in this research report excludes, restricts or modifies a statutory warranty or liability to the extent such an exclusion, restriction or modification would be prohibited under Australian law.

Additional information for clients in Canada

This research report and the information included herein is general investment advice that is not tailored to the needs of any recipient and, accordingly, is distributed to Canadian residents in reliance on section 8.25 of the Canadian Securities Administrators' National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. For disclosures regarding any financial or other interest that DNB Bank ASA, DNB Carnegie Investment Bank AB and their affiliates may have in the issuer or issuers that are the subject of this research report please see the potential conflict of interest section and the company-specific disclosures section.

Additional information for clients in Singapore

This research report is distributed by the Singapore Branch of DNB Bank ASA. It is intended for general circulation and does not take into account the specific investment objectives, financial situation or particular needs of any particular person. Please seek advice from a financial adviser regarding the suitability of any product referred to in this research report, taking into account your specific financial objectives, financial situation or particular needs before making a commitment to purchase any such product or security. You have received a copy of this research report because you have been classified as an accredited investor, an expert investor, or as an institutional investor, as these terms have been defined under Singapore's Financial Advisers Act (Cap. 110) ("FAA") and/or the Financial Advisers Regulations ("FAR"). The Singapore Branch of DNB Bank ASA is a financial adviser exempt from licensing under the FAA but is otherwise subject to the legal requirements of the FAA and of the FAR. By virtue of your status as an accredited investor, institutional investor or as an expert investor, the Singapore Branch of DNB Bank ASA is, with respect to certain of its dealings with you or services rendered to you, exempt from having to comply with certain regulatory requirements of the FAA and FAR, including without limitation, sections 34, 36 and 45 of the FAA. Section 34 of the FAA requires a financial adviser to disclose material information concerning designated investment products that are recommended by the financial adviser to you as the client. Section 36 of the FAA requires a financial adviser to have a reasonable basis for making investment recommendations to you as the client. Section 45 of the FAA requires a financial adviser to include, within any circular or written communications in which they make recommendations concerning securities, a statement of the nature of any interest which the financial adviser (and any person connected or associated with the financial adviser) might have in the securities. Please contact the Singapore branch of DNB Bank ASA at +65 6260 0111 with respect to any matters arising from. or in connection with, this research report. This research report is intended for and is to be circulated only to people who are classified as an accredited investor, an expert investor, or an institutional investor. If you are not an accredited investor, an expert investor or an institutional investor, please contact the Singapore Branch of DNB Bank ASA at +65 6260 0111. DNB Bank ASA, its affiliates and subsidiaries, our associates, officers and/or employees may have interests in any products referred to in this research report by acting in various roles including as distributor, holder of principal positions, adviser or lender. DNB Bank ASA, its affiliates, subsidiaries, our associates, officers and/or employees may receive fees, brokerage or commissions for acting in those capacities. In addition, DNB Bank ASA, its affiliates and subsidiaries, our associates, officers and/or employees may buy or sell products as principal or agent and may effect transactions that are not consistent with the information set out in this research report.

Additional information for clients in the United States

The research analyst(s) named on this research report are foreign research analysts as defined by FINRA Rule 1220. The only affiliates contributing to this research report are the investment services division of DNB Bank ASA and DNB Carnegie Investment Bank AB (a wholly owned subsidiary of DNB Bank ASA) ("hereinafter DNB Carnegie"); the foreign research analysts employed by DNB Carnegie are named on the first page; the foreign research analysts are not registered/qualified as research analysts with FINRA; foreign research analysts are not associated persons of DNB Carnegie, Inc. and therefore are not subject to the restrictions set forth in FINRA Rules 2241 and 2242 regarding restrictions on communications with a subject company, public appearances and trading securities held by a research analyst account.

This is a Third-Party Research Report as defined by FINRA Rules 2241 and 2242. Any material conflict of interest that can reasonably be expected to have influenced the choice of DNB Carnegie as a research provider or the Subject Company of a DNB Carnegie research report, including the disclosures required by FINRA Rules 2241 and 2242 can be found above.

This research report is being furnished solely to Major U.S. Institutional Investors within the meaning of Rule 15a-6 under the U.S. Securities Exchange Act of 1934 and to such other U.S. Institutional Investors as DNB Carnegie, Inc. may determine. Distribution to non-Major U.S. Institutional Investors will be made only by DNB Carnegie, Inc., a separately incorporated subsidiary of DNB Bank ASA which is a U.S. broker-dealer registered with the Securities and Exchange Commission ("SEC") and member of the Financial Industry Regulatory Authority ("FINRA") and the Securities Investor Protection Corporation ("SIPC").

Securities offered and sold in the U.S. are provided through DNB Carnegie, Inc. (SEC #8-66024 / CRD#127605)

Any U.S. recipient of this research report seeking to obtain additional information or to effect any transaction in any security discussed herein or any related instrument or investment should contact DNB Carnegie, Inc., 30 Hudson Yards, 81st Floor, New York, NY 10001, telephone number +1 212-551-9800

At DNB Carnegie, we are dedicated to being the most respected partner for Nordic investment banking and wealth management solutions, leveraging the full capabilities of DNB. With unmatched strength across products, sectors, and geographies, our commitment is crystal clear: Clients first!

We deliver tailored financial solutions in mergers and acquisitions, capital markets, and financial advisory services by leveraging our deep market knowledge and expansive international reach. As an agile investment bank and part of a major Nordic banking group, we offer unparalleled local expertise, exceptional placing power, and a unique network.

Our roots run deep in the Nordic region, with strong local offices in Sweden, Norway, Denmark, and Finland.

This solid foundation is amplified by our global presence in London, New York, and Singapore.
